

STANDARDIZE AND ACCELERATE YOUR RPA DEPLOYMENTS

You need to get started with your Robotic Process Automation (RPA) deployment, but where do you begin? Not all processes are created equal, and just because you can automate it does not mean that you should. Deciding which processes to automate and in what order is the first step in ensuring that your project will be successful.

The iGrafX RPA Module provides you with the ability to accelerate your RPA initiatives by identifying which processes are candidates for RPA, then strategically prioritizing them for deployment. Combined with the iGrafX Business Transformation Platform, you can use the power of process knowledge to provide transparency for monitoring process performance, compliance and governance.

Key Feature	Benefit
Process Assessment	Standardized identification of determining if a process is a candidate for RPA
Understand Savings	Accurately forecast FTE / Cost savings of RPA deployment
Platform Integration	Integrates with iGrafX Platform to update existing, or create new, Process objects
Priority Reporting	Easy to understand reports to identify RPA candidates by Effort, Savings, and Complexity
Strategic Alignment	Identify candidates for RPA and prioritize work based on strategic corporate goals to ensure the greatest visibility and impact
Compliance and Control	Once deployed, monitor processes for compliance with iGrafX's inherent Risk Management capabilities
Transparency	Report on and clearly identify where automation is deployed within your process and organization

The iGrafX RPA Assessment is ideal for organizations:

- Needing Governance and Standardization around Bot Deployment
- In need of transparency within their RPA deployment strategy
- Requiring a standardized method for determining RPA candidates
- Who wish to align RPA with corporate strategy
- Just starting their RPA initiatives
