

## ENTERPRISE-WIDE MONITORING AND CONTROL

Identify problems and issues before your customers do. With a real-time window into your company's process behavior and operational effectiveness, your organization reacts with speed and effectiveness to deliver optimum performance.

| Key Feature                   | Benefit  |
|-------------------------------|--|
| Scorecards                    | Display Strategic, Tactical and Operational Indicators in a hierarchical view corresponding to your organization's strategy, goals and objectives. |
| Flexible Model                | Choose which performance data is important for your business: KPIs, PPIs, SPIs relative to goals, processes, resources, capabilities and more      |
| Customizable Dashboards       | Review personalized dashboards and summary charts highlighting the right level of information at the right me.                                     |
| Traffic Light Roll Up         | Identify problem areas quickly with aggregated indicators that reveal appropriate detail as you traverse the hierarchy.                            |
| Process Landscape Integration | View related and/or supporting process maps, resources and other objects via iGrafX Web Central.   |
| Real Time                     | Access measurements the moment they are stored.  |
| Highly Scalable               | Monitor KPIs from a virtually unlimited size and quantity of data sources.   |
| Instant Comments              | Collaborate quickly with others on reported information, reducing reactivity time.   |
| Security                      | Utilize your authentication mechanism of choice, e.g., LDAP, Kerberos, Smart Card, etc. and restrict access to sensitive data.                     |
| Multiple Views                | Perform discrete and aggregated analysis for accurate decision making.   |

# Business Performance Management

iGrafx®

## Increase Transparency and Lower Costs

Performance measurements are more intuitive and meaningful to the business when displayed in relation to business strategies and goals.

By dynamically charting the right performance metrics at the right me, iGrafx reduces the time executives need to check performance of their processes, and the time process owners need to react.

Process and performance transparency is increased as both the context and 'ripple effects' of strategic, tactical and operational measurements are easily interpreted. Users can gain access from anywhere to relevant measurements and stay tuned to the most recent updates.

iGrafx Business Performance Management provides users the ability to tailor dashboards to their needs while maintaining a consistent design across the organization.

## A Business Process Management Extension

Performance Indicators are layered over your business model, taking your investment in process-oriented architecture to a new level. iGrafx leverages your existing process landscape to display measurements in context for maximum understanding. Backed with information on the performance, health and status of your business collected live from multiple data sources, you will be poised for the next step in your journey to process excellence.

## Looking for a Jump Start with iGrafx?

Leverage our expertise for a higher ROI. Our training and consulting services can help you apply the power of iGrafx even faster. For more information, please visit [iGrafx.com/services](http://iGrafx.com/services).
