

# TRAINING READY UNIT INSTALL, COMMISSIONING, & TRAINING

## **Delivery**

LION will transport units to the customer's training site with up to a 53ft chassis. Units will arrive at the nearest US port to the customer's site before transfer to a tractor trailer.

### **Installation**

LION will place units in their final position utilizing a boom crane. Crane and chassis must be within 20 feet of the placement area. LION will connect all customer-installed utilities to the unit.

# Standard, Norms and associated Drawings and Documents | Compared Norms | Amount | Amoun

## **Commissioning**

LION will assure that all systems and components are designed, installed, tested, operated, and maintained according to operational requirements and NFPA specifications.

## **Training**

LION will provide instruction on start up / shutdown procedures, safe operation, basic troubleshooting, and maintenance.
