To Whom it May Concern,

I am the Owner of Trillium Bilingual Montessori and I have been using Tuio since the summer 2020, and I have loved the experience so far.

The software is so easy to use, and it keeps everything organized and neat. We no longer have to chase parents down for payments. It's also such a help that Tuio handles the reconciliation of failed payments as well.

Tuio has been such a time saver, and so easy to use, it takes maybe 15-20 minutes a week of upkeep and that's it! Our parents love the platform and how user friendly and convenient it is for them too!

One of the things I like most about Tuio is the ability to generate tax receipts in minutes! As you know, many of us school administrators are not trained in accounting or business management. I really HATE having to do my tax receipts each year. I dread it for weeks.

Then I started going through the steps on Tuio and figured I would do a "trial run". 10 minutes later, I was emailing parents their tax receipts, it was that simple! I have enjoyed Tuio up to now, but today, I have fallen in love with Tuio!

You have a true believer in what you do!

Sincerely,

Melanie Tremblay
