To Whom it May Concern,

I am the Director of Valley of the Sacred Heart in Dixon, California and I have been using TUIO since the summer of this year, and I have really enjoyed the experience so far.

One of the things that I enjoy most about using TUIO is the fact that I do not have to deal with collecting cash or cheques from parents anymore, this has saved me time each month and has been really helpful because it allows for a more streamlined way of processing payments.

As a smaller school, I still find we save at least a few hours a month that I would have spent collecting cheques and going to the bank for deposits or creating invoices. Now, thanks to TUIO, I only have to sit down once a month to go over my payments and invoices and I'm done until the next months billing cycle.

One of the things I like most about TUIO is how simple and easy it is to use. Everything is very straight forward, even for those who may not be tech savvy. I've also really appreciated the fact that when I've had to use the TUIO support team, I have gotten a quick and efficient response.

Sincerely,

Chris Simpson

Chris Simpson
