

ENHANCE THE DIGITAL EXPERIENCE OF YOUR STUDENTS, FACULTY & STAFF

7SIGNAL®

RUNNING APPLICATIONS LIKE A LEARNING MANAGEMENT SYSTEM OR VIDEO CONFERENCING TOOL IN AN UNCONTROLLED AND WIDELY VARIABLE ENVIRONMENT PRESENTS A UNIQUE CHALLENGE TO IT AND OPERATIONS LEADERS BECAUSE OF THE LACK OF VISIBILITY AND CONTROL OVER THE ENVIRONMENT.

Almost overnight your students, faculty and staff transitioned to remote environments and your teams lost the ability to identify and resolve connectivity issues quickly. The 7SIGNAL platform provides the only solution on the market that gives IT & networking professionals visibility into home networks regardless of the ISP or router. Gain visibility into the performance of any Windows, Linux, macOS or Android by deploying an endpoint-based digital experience monitoring solution.

GAIN A COMPETITIVE ADVANTAGE

Technology is increasingly seen as a crucial enabler and competitive differentiator for higher education institutions. A larger portion of your technology depends on a reliable connection to the Internet. If connectivity fails your technology ecosystem cannot be supported and digital experience suffers. The end user doesn't blame the internet they blame the institution and the technology for their poor experience.

DEPLOYMENT & OPERATIONS

7SIGNAL Agents can be deployed and removed from most Mobile Device Management (MDM) software platforms or downloaded from a mobile store or direct link. The endpoint-based agent can be set to uninstall automatically after a period of time or remain on the device for continuous monitoring. Our software is lightweight and has a minimal impact on battery life because processing of data is done in the Amazon cloud and not on the client.

WHY 7SIGNAL?

- ✓ Gain visibility into and control over end-user home networks
- ✓ Identify and resolve issues for remote workers and students faster.
- ✓ Maintain online testing accreditation
- ✓ Expand your wireless network visibility into every lecture hall, dorm, research lab and sports complex
- ✓ Monitor remote Wi-Fi issues without the need for walk-around tools
- ✓ Prevent faculty from calling you into their classroom to support disconnected devices

DISCOUNTED HIGHER EDUCATION PRICING

MONITORING PACKAGE

100 REUSABLE 7SIGNAL AGENTS
(UNLIMITED INSTALL & REMOVAL)

ONLY
\$9,950
PER YEAR

HOW IT'S DIFFERENT

7SIGNAL software "lives on the edge", on client devices, where the wireless experience matters most.
