EMPOWER YOUR CAREGIVERS TO FOCUS ON OUTCOMES, NOT CONNECTIVITY

7SIGNAL®

7SIGNAL BRIDGES THIS GAP BETWEEN CAREGIVERS AND IT WITH WIRELESS NETWORK MONITORING SOLUTIONS. 55% OF HOSPITALS SPEND UP TO 500 HOURS PER YEAR ON WI-FI MAINTENANCE.

7SIGNAL helps you keep your ecosystem connected so check-ins; medical data collection and treatment plan coordination is unaffected.

Fast, reliable Wi-Fi is critical to delivering great patient care. Hospitals that can monitor, pinpoint and resolve Wi-Fi issues quickly empower caregivers to focus on patient outcomes, not connectivity.

WHY 7SIGNAL?

Patient outcomes depend on patient information capture and delivery between physicians, nurses and other caregivers on treatments. 7SIGNAL continuously monitors the Wi-Fi network and medical devices and sends notifications before you get a helpdesk call.

Disconnected devices cause patient safety issues. Going back to manual forms during outages or data corruption issues with enterprise devices can cause patient safety issues. Correct data is especially critical during care transitions where 80% of all serious medical errors occur. 7SIGNAL is installed on the client and acts as a continuously running utility to solve connection issues.

Patient satisfaction and the correlation to connectivity. Each patient within a hospital has on average 3-6 devices attached to them. If it takes a nurse approximately 5-15 minutes to visit each patient and check all vital signs, he or she can only visit approximately 4-12 patients per hour. 7SIGNAL is the solution "Connected Hospitals" depend on for connectivity.
