

SUPERIOR CALLS AND CONFERENCING STARTS WITH STRONG WI-FI EXPERIENCES

WHEN VoIP CALLS AND WEB CONFERENCES ARE MISSION-CRITICAL, YOU NEED CONNECTIONS THAT THRIVE

Meetings, VoIP and video conferences are the lifeblood of organizations worldwide. From the boardroom to the daily stand-ups, they are where decisions are made and where deals are finalized. And in today's work-from-anywhere environment, the need for flawless call experiences is even more critical. That's where the digital experience solutions from 7SIGNAL can help.

As a Wi-Fi experience monitoring platform, 7SIGNAL can provide insight into the networks and devices powering the connections between teams. Our solutions allow users to pinpoint possible issues and proactively deliver solutions before employees complain or experience friction on either end of a voice or video call.

Whether you need to monitor and manage on-site VoIP systems to improve MOS scores or assist in troubleshooting and improving connections for remote staff, our platform will ensure a better experience for all.

BENEFITS BEYOND CONFERENCING

- ✓ Gain visibility into Wi-Fi network and endpoint experiences for proactive planning
- ✓ Vendor-agnostic solutions work with existing enterprise networks, access points and devices
- ✓ Improve networking and IT team efficiency
- ✓ Reduce downtime and employee frustration

OUR MODULES

7SIGNAL SENSORS

7SIGNAL's premier hardware solution that monitors wireless experiences on-site from the outside-in to ensure flawless experiences on VoIP devices, computers and more.

7SIGNAL AGENTS

7SIGNAL's software client that runs directly on Windows, macOS, Android and Linux devices to monitor, troubleshoot and strengthen connections for remote users.

Together, 7SIGNAL sensors and agents complement the WLAN infrastructure and provide a comprehensive view into the wireless experiences that power the way your business connects and works.
