“

I have really enjoyed using the furniture in the classroom. I have used the whiteboard desks for exit tickets, as well as skills practice and group work. I like how flexible the seating arrangements can be and also how quietly I can move desks about the room; an underrated feature but such a welcome change from traditional desks screeching across the floor! The high tables and chairs feel very much like a post-secondary work/study space.

”

“

The furniture has been awesome in the classroom. I have been able to quickly rearrange the space to suit the needs of the day. I love the whiteboard table tops. They have allowed students to quickly take notes and engage with one another in an eco-friendly way. I think the furniture makes the classroom more inviting to students because it isn't as formal. The furniture encourages conversations and dialogue. The MOV stools have been great for students who need to fiddle with something to stay engaged with the lesson and has lessened disruptions.

”

“

I really like being able to move the desks into different groupings depending on the activity we are doing. It has been helpful to have students brainstorm ideas using the desks as whiteboards as well. It will be hard to go back to a traditional classroom after using this set up!

PROJECT

Newly constructed high school in Toronto. Project included modern classrooms and a Learning Commons. School is planning on replacing all of the classroom furniture that was brought from the old school in phases.

DESIGN INTENT

Open, flexible space to allow for group work, independent study, and diverse learning needs.

SOLUTION

Non-traditional, comfortable, different seating and easily moveable.

Learning Commons with the curved shelving, high tables, Expanse and Nebula, etc.
