NXT MOV Seating

NXT MOV two-piece shell allows for micromovements that relieve stress and pressure points, reducing fatigue and allowing students to concentrate.

Rockers

Rocking motion provides a soothing and reassuring feeling for students, allowing them to de-escalate and refocus.

MOV Stools

Movement solutions that promote wellness. The MOV stool engages core muscles and permits students to move in a fun and productive way.

Round + Pixel Rocker

Soft seating options in classrooms provide comfort and choice. From floor to seated positions let students pick.

In today's learning spaces:

- ✓ Movement seating that rocks, rolls, and wiggles promotes engagement and productivity.
- ✓ Flexible seating gives students the chance to collaborate easily in various group settings.
- ✓ A variety of seating options that allows students to pick their seat promotes ownership.

INDIVIDUALIZED SOLUTIONS FOR COMFORT AND MOVEMENT

STUDENT CHAIRS

| | | |
|---|--|---|
| NXT MOV® | Revolutionary 2-part shell design permits continuous micromovements for comfort and concentration. | Good for: classes that require longer periods of continuous seating (50+ minutes). |
| Alphabet | Designed to sit "in" instead of "on", Alphabet's single shell design hugs the body and provides flexibility. | Good for: classes that require students to sit 20-40 minutes. |
| Discover | Great task chair for everyday use. Discover's supportive design with lumbar support pushes students into learning. | Good for: active classrooms where students are encouraged to change seating options frequently (15-20 minutes). |
| Movement Seating: MOV Stool, Round Rocker, Pixel, Rockers | Intentionally designed to provide students more movement, engaging the core and the brain. | Good for: students who need movement to concentrate, optional seating for any student. |
