

Hive

probax.io/hive

Life in the hive transforms how you do data protection, and it has never been easier

SIMPLIFY

Simplify the complexity of protecting multiple customer environments and workloads - on premises, cloud and hybrid cloud.

REDUCE TIME & COST

Advanced in-built automation reduces engineering time spent on deployment, configuration, monitoring and management of data protection solutions.

COMPLETE DATA PROTECTION

Activate, monitor and manage a range of award-winning data protection solutions as needed. It's never been easier.

INTELLIGENT RISK ALGORITHMS

Benefit from Hive's propriety automation and monitoring engine to verify data protection compliance and data integrity.

ENTERPRISE GRADE SECURITY

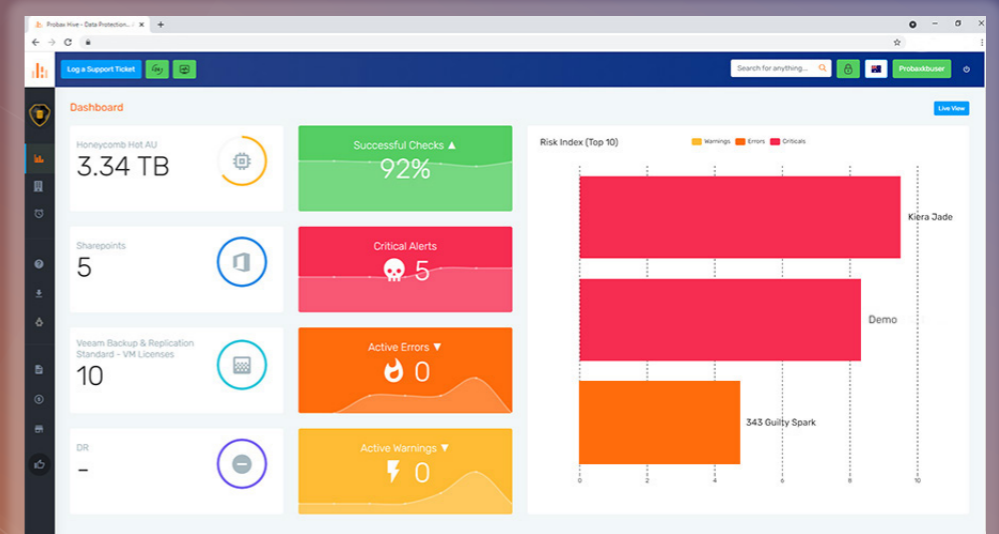

Utilize security groups and enable Multi-Factor Authentication to enhance security and control

OVERVIEW

Hive solves complex data protection challenges by providing partners with a single-pane-of-glass management console and unmatched intelligence, automation, security, monitoring, and reporting capabilities.

Hive is the ultimate data protection dashboard for MSPs who are managing multiple client environments and workloads using Veeam, StorageCraft, Microsoft Office 365 and/or Dropbox.

“To scale quickly you need simple, effective solutions that provide real value. This is one of them”

- Mark Shaw, VP of Technology at Techs+Together

“Hive saves our team a lot of time. We can now focus our energy on creating exceptional IT solutions that enhance the business processes of our customers”

- Dean Wallance, CTO at Winthrop Australia
