

Honeycomb Cold Storage

probax.io/coldstorage

Incredibly simple and completely automated. Our award-winning solution for long-term retention

HIGHLIGHTS

SIMPLICITY

Honeycomb Cold Storage archive points are created directly from your primary storage according to a set and forget schedule, eliminating the need to transfer additional data to Probax. Restore files and directories to Honeycomb Hot Storage with a single click.

SECURITY

The volumes of your data are securely “air-gapped” and cannot be deleted, accidentally or maliciously, before the set expiry date.

SCALABILITY

Your storage capacity is dynamically and automatically scaled according to conditions you define.

OVERVIEW

Honeycomb Cold Storage is designed to provide simple and cost effective data archival that delivers comprehensive automation capabilities when used with Veeam Backup & Replication.

With a simple, predictable pricing model and incredibly low costs for data storage, businesses can leave behind the risks and inefficiencies of legacy tape hardware.
