

# Honeycomb Hot Storage

[probax.io/hotstorage](https://probax.io/hotstorage)

The industry's most versatile and easy to use cloud storage for reliable data protection

## KEEPING IT SIMPLE

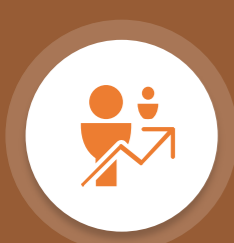

### FUNCTION

Single platform that integrates with multiple backup & availability vendors, giving you a single-pane-of-glass view of all your backup jobs. Manage, monitor, verify and recover files and folders direct from a centralized portal.

### SECURITY

Data stored in segregated storage tubs on highly-available storage clusters in your location of choice. The extensive redundancy & resiliency measures across our many geographic locations ensures your clients' data is safe.

### VALUE

Pooled cloud storage across your customer-base and no hidden fees for data operations or retrieval. Probax's intelligent automation frees the time of your techs for more critical tasks, increasing efficiencies of scale across your business.

## OVERVIEW

Probax's Honeycomb Hot Storage can provide complete protection of your clients' data wherever it lives - whether it's on premises, private cloud or public cloud, we've got you covered. And with over 10 global availability zones, we can keep your clients' valuable data in the same region.

## BACKUP WITH THE BEST

**veeam** | **CSPPARTNER Platinum**

As an approved VCSP Reseller Ready partner, Probax is recognized as one of the top VCSP partners that offer out-of-the-box ready solutions

-  Pooled storage
-  Active-active storage clusters
-  Massive scale-out capacity
-  Seed and restore at over 1Gb/s
