Quality Assurance Engineer

Jorsek Inc., the makers of easyDITA (http://easydita.com), a Software as a Service used by global companies both big and small, is growing and eager to make a big impact on the world! easyDITA helps information developers write and deliver technical documentation, help content, eLearning, and other high-value business content.

We're looking for a full-time Quality Assurance Engineer who is a sharp and strong team player. This individual will work alongside our product development team to define, document, analyze, perform, and interpret moderately complex developmental tests for new and/or modified product components. The ideal candidate will be extremely detail-oriented and process-driven, with some working knowledge of the principles, practices, and procedures used in test engineering.

As Jorsek is built on an ethos of customer support, every one of us contributes to each customer's success. Good communication skills are essential. Our QA Engineer must have the ability to work well in a team and also work well independently.

The Quality Assurance Engineer will be responsible for:
- Designing test schemas, working with all facets of the software development team from UX, front end and back end engineering to ensure the tests are comprehensive.
- Building automated test scripts and, when necessary, manual test procedures.
- Conduct all Quality Assurance testing, both manual and automated, for all new and modified product components.
- Test user interfaces for mobile responsiveness, device compatibility, and browser compatibility to ensure that what we build is capable of running properly on a variety of devices, screen sizes, and browser types.
- Providing regular, detailed status reports on project progress, including test cases executed, bugs discovered, and bugs fixed.

Requirements:
- Experience working in a software development environment.
- Strong work ethic and the ability to focus and single-task or multi-task throughout the day.
- Ability to work well with team members within an agile development team.
- Very strong attention to detail. We want you to sweat the small stuff.
- Excellent written and verbal communication skills.

Must have a strong working knowledge of:
- Software testing, backend API testing as well as frontend UI testing
- Test-driven Development
- JSON/JavaScript

Great to have, but not required:
- HTML(5)
- Experience working in an Agile team

Nice to have:
- Jira
- Testim
- GitHub
- CSS3
- XML
- DTD/XML Schema

Why work at Jorsek?

We're a growing Rochester software startup. Our product is easyDITA.com, a game-changing authoring and content management system. It's used to write and publish product manuals, help content, eLearning, and other high-value business content. We love solving information development and content problems.

Salary:
- PLN 6,000.00 - 12,000.00 gross (regular employment agreement)

Other:
- Office: Basztowa Street, Kraków
- Employment start: as soon as you're available
- Employment end: indefinite
- Working hours: Polish
- Flexible working hours
- Private healthcare
- Possible work from home
- Great team and atmosphere

This position is full time, **we will only consider candidates located in Krakow, Poland**. Please send your CV in English to gosia.radymiak@jorsek.com. In the email, specify which position you're interested in. Thank you!
