

# IT Value Recovery

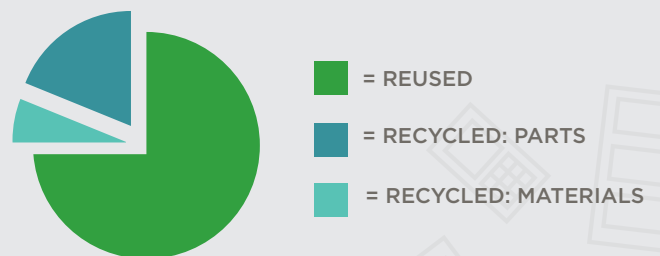

## Your Gadgets Have More to Give

**Repair and refurbishment optimize financial results and sustainability.**

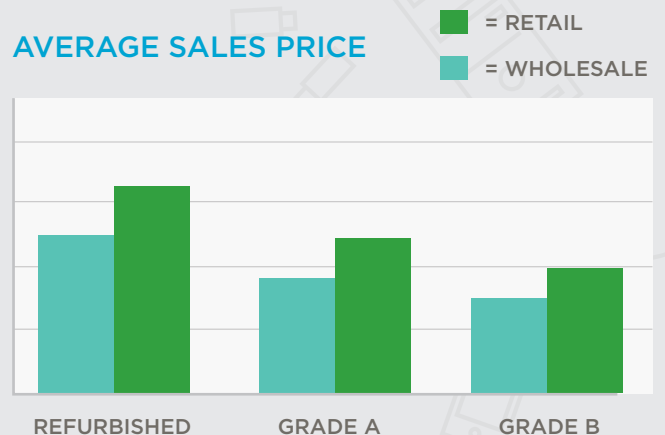

Our mission is finding a new home and greater value for every device you send us. So we can't think like recyclers. Non-working items, missing accessories, and devices with cosmetic damage all degrade the worth of your hardware portfolio. Instead of automatically shredding the misfits, we see the flaws as our opportunity to recover customer value.

Sage systems are integrated with the Sage BlueBook, the world's largest repository of used electronics information. Based on objective market data for every device, we calculate when to repair, when to refurbish, even when to harvest parts and recycle. We invest in parts, accessories, software, and labor to improve Reusable Yield whenever the increase in value recovery exceeds the cost of service, producing a greener result for both the earth and your wallet.

### REUSABLE YIELD

# Our Key Features

## REFURBISH & REMARKET

We refurbish and remarket all hardware platforms, from mobility, to data center, to the desktop. And we don't ignore the little stuff like accessories and peripherals.

## PRECISE DATA

Our triage process is governed by value data from Sage BlueBook, not wasteful, imprecise "cut lines."

## INCREASE VALUE

As a Microsoft Authorized Refurbisher, we increase the value of refurbished PCs with low cost, genuine software.

AUTHORIZED  
Refurbisher

## YOU HAVE A CHOICE

Customers can choose settlement periods ranging from 30 to 90 days, providing full opportunity to share in the Sage Upside, or to opt for quick cash.

## How We're Different

The Sage BlueBook turns all our technicians into used electronics geniuses. Our automated workflows ensure consistent execution of every step required to eliminate risk, secure data, and optimize value for every device. We resell more and recycle less than anyone else in our industry, for superior financial and sustainability results.
