

# Your step-by-step guide on how to sequence videos in Adobe

Say goodbye to hours of painful scrubbing with Trint.

## Find key selects with ease

Save time scrubbing through video and let Trint help you sequence your clips so you can spend time focusing on the creative and editorial process.

### 1. Transcribe your video

Upload your video to Trint and select your preferred settings including language and Workspaces.

*Pro tip: upload a proxy file for faster transcriptions.*

#### Step 2/2: Select a language.

Optimize the quality of your automated transcript by selecting the language of the people speaking.

FILE LANGUAGE VOCAB BUILDER\* DETECT SPEAKER CHANGE WORKSPACE

Recording.m4a English (British sp) [checked] [checked] No Workspace

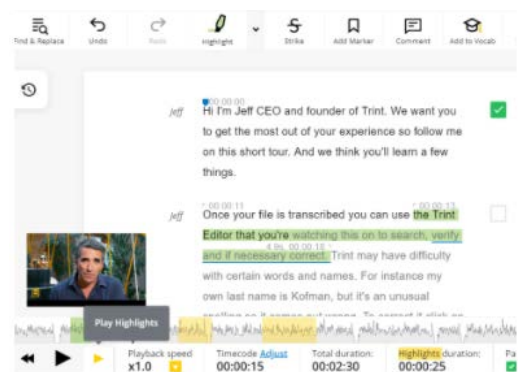

\* Vocab Builder  
Have a last-minute custom word?  
Add it in [Vocab Builder](#) before you click "Transcribe."

English transcription just got more accurate  
We just released improvements to the English algorithm that make it more accurate. You can also choose American or British spelling from the language drop-down menu.

Cancel Transcribe

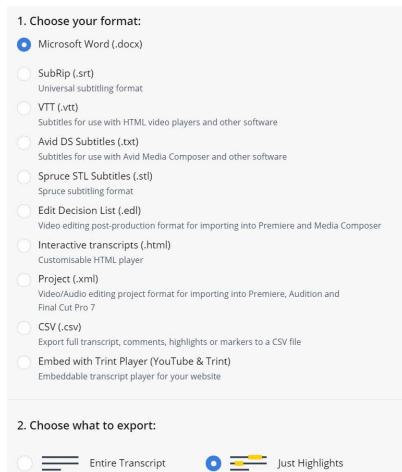

### 2. Find key soundbites

Find and highlight key time-coded soundbites in the Trint Editor. Here you can collaborate with team members to edit and verify the transcript. Use the playback feature to watch the video as the transcript unfolds or select *Play Highlights* to play the rough sequence only.

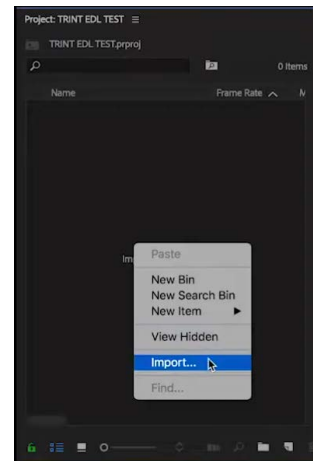

### 3. Export your file

You can export in a variety of formats including EDL, SRT and VTT. Select *Just Highlights* to export time-coded selects to Microsoft Word or a CSV file.

### 4. Import your EDL file

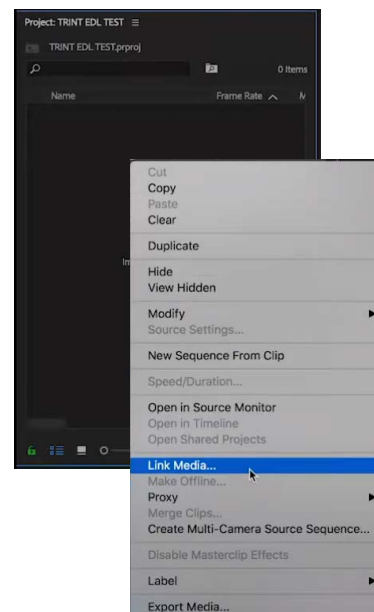

Open Adobe Premiere and in the *media window* right click to *import* your full res video and your EDL file. Select your *video standard*.

### 5. Link up your files

In the *media window*, right click to select *Link Media* then *Locate files* to connect your EDL files with your full res video.

Your video is now sequenced in Adobe!

## Goodbye painful processes, hello seamless sequencing

Sequence your video in moments with Trint's free Premiere extension and get to the final cut seamlessly.
