

Make your content accessible

Demand for accessible video content is growing: 85% of online videos are now watched without sound. Younger audiences are consuming more and more content through video and customers expect brands to share content on all the channels they use.

And with accessibility regulations becoming more widespread, how can marketing teams keep up with market demand?

1. Improve inclusion

- Captioning your spoken content opens it up to a wider audience
- Increase distribution with translated subtitles
- Tell your story however your audience consumes content

2. SEO

- Transcribe the final cut to post the full transcript
- Rank for keywords and scale search engine results pages
- Make your content searchable to increase distribution

3. Easily caption

- Grab ready-made captions
- Easily translate and subtitle foreign language content
- Export in a variety of formats including EDL and VTT

Security

Your data and security are our top priority which is why no one sees your data but you. Our ISO 27001 certified platform offers best-in class security.

Support

Our dedicated Customer Experience team is on hand to help you get the most out of Trint.

Integration

Use our powerful APIs to connect Trint to your most used systems to power your onward workflows.
