

# Go where the story takes you. Securely.

Investigative journalism is critical for truth-telling. To get to the heart of complex stories, teams need simple ways to capture, track and understand information, while coordinating workflows. Trint helps journalists focus on diving deep, with the most secure platform available.

## 1. Organize in one secure place

Store interactive transcripts in secure, sequestered Workspaces, where members can be added and provisioned based on confidentiality and role in the team. The right people, the right access.

## 2. Connect the team

Rapidly upload and transcribe interviews from the field with Trint's mobile app, or in the newsroom from your desktop. Edit, understand and Verify what was said and go back as needed with version history.

## 3. Confidentiality, protected

Sources and information need to be protected. Remove team members from Workspaces when needed and delete work upon completion. Work stays within your walls, protected even from Trint.

### Security

Your data and security are our top priority which is why no one sees your data but you. Our ISO 27001 certified platform offers best-in class security.

### Support

Our dedicated Customer Experience team is on hand to help you get the most out of Trint.

### Integration

Use our powerful APIs to connect Trint to your most used systems to power your onward workflows.

World-class teams collaborate with Trint
