

# CYBERSECURITY AIR-GAP BACKUPS

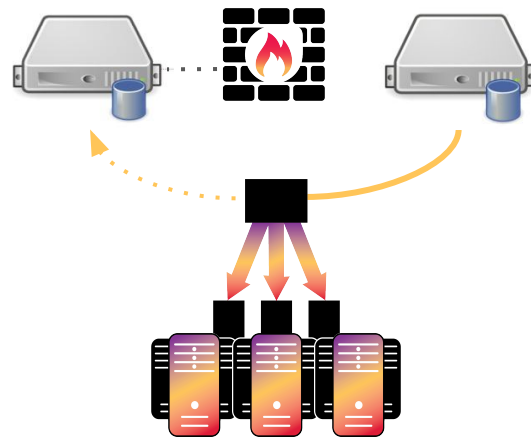

## Don't Lose to Ransomware Attacks

As malicious attacks are rapidly evolving, your security measures must work double time. No matter the size or scale of the business, all are potential marks for cyberattacks.

Given the potentially devastating impact a breach could have on your business, there's little time to upskill. We can fill the gaps, strengthen your defenses and rest easy knowing ERP Suites Managed Security has your business covered.

### Extending your security measures

With Air-Gap backups, ERP Suites adds another layer of security for your business. Your backups are physically separated so there is no direct connection to production servers.

### Keep your backups safe

Air-Gap backup files are read-only with 1-hour access windows so hackers won't be able to delete backups.

### Extremely Fast Recovery Times

Snapshots of your backups get you back up and running within 2 hours so you aren't waiting days to resume business.

## Benefits of Air-Gap Backups

Secure

Limited Access Windows

Fast Recovery

The average downtime  
from a ransomware  
attack is

**21**  
**days<sup>1</sup>**
