

## ZIOSK TETHER

# MODERNIZE PAYMENTS WITHOUT A NEW POS

Every day you hear about yet another security breach in the restaurant industry. And the most important security you need to provide to your guests is for their payment information. The US has the highest per capita cost for data breaches at \$233 for each compromised card and totaled \$31 billion in 2017. With reissuing fees and fines, that number can quickly skyrocket into a very expensive problem.

## Outdated POS? We designed Ziosk Tether just for you.

Ziosk Tether is the simplest, quickest and most cost-effective way to reduce/eliminate your liability without completing a costly upgrade to your POS.

- Save each restaurant location an average of \$75 per location per month in EMV Liability Chargebacks and Fees.
- Eliminate hundreds of thousands of dollars of risk in reissuing fees and fines by preventing a data breach.
- Integrates seamlessly with Micros & Aloha POS systems.
- Ziosk Tether is free with Ziosk Payment Processing!\*

\*Without payment processing, Ziosk Tether is \$99 a month for 4 device; \$15 a month for each additional device.

**Better payments,  
same hardware**

Ziosk Tether works with what you already use, saving you time, cost, and frustration.

## WHAT CAN TETHER DO?

# THE SIMPLE PAYMENT SOLUTION

### What Tether delivers:

- Provides the highest level of payment security with EMV and P2PE built into our hardware.
- EMV certified with all major payment processors and integrates with Aloha and Micros POS.
- Can also be customer facing at a counter with a branded home screen and used for to-go and curbside orders.

### How it works:

- Tether to each POS terminal, run payment through it and PCI liability is eliminated for fraudulent charges and counterfeit cards.
- The server/bartender will press pay on the POS terminal and the check will appear on the tablet to go through payment flow.
