

ZIOSK VIRTUAL

MEET GUESTS WHERE THEY'RE AT—VIRTUALLY

With the complications of COVID-19, limiting unnecessary touches between servers and guests is more important than ever. Ziosk may be best known for the tabletop tablet, but now Virtual Ziosk allows table service, fast casual, and quick service restaurants to provide contactless menu browsing, ordering and payment—all through a POS-integrated, web based solution on the guest's mobile device.

Designed for safety, speed and simplicity

With our new Virtual Ziosk, you can provide a hardware-free, contactless guest experience.

- Safe, secure, contactless ordering and payments
- No apps to install
- No need to re-enter orders on the POS
- No extra hardware necessary
- Web experience accessed via QR code through the guest's own mobile phone
- For table service, guests can order, reorder and pay with the QR code on table
- For fast casual and QSR, guests can order and pay with QR code wall signage
- Ability for guests to keep an open tab or close/pay check immediately
- POS Integrated for ordering and payments
- PCI compliant with payment flow out of scope
- Single settlement available with Ziosk Payment Services
- Supports Apple Pay and Google Pay

**Connect with guests
from anywhere**

Ziosk Virtual makes orders and payments fast, easy and safe, all from your guests' own devices.

WHAT CAN VIRTUAL DO?

ORDER AT THE TABLE OR ON THE GO

Ziosk Virtual lets you provide your guests a safe, secure way to browse, order and pay from their own phone. There are no apps to install, no extra devices needed, and no contact necessary.

- Guests scan the QR code at their table or visit the mobile website while on the go
- Guests browse and select menu items, just like on our tabletop tablets
- Guests customize their menu choices and place their order
- When they're finished, guests can pay and tip right from their own devices
