

# Cost savings and streamlining made simple with SIP Trunking from IP Telecom

SIP trunking is a clever solution for businesses to significantly reduce cost overheads and be business ready for the shutdown of the PTSN network across Europe which is currently underway. SIP Trunking with IP Telecom allows all your calls to connect to public network via the IP Telecom allowing a huge deal of flexibility for your business and all the benefits and cost-savings that IP based Telephony brings.

## Ireland's leading SIP Trunk provider

As an industry-leading provider of SIP trunks to Irish business and the telecoms industry, IP Telecom have considerable expertise in the deployment of SIP Trunks for Business and their integration into your telecoms infrastructure. With unbeatable pricing, dedicated customer service and a substantial track record of delivering SIP Trunking services to customers we're your number one choice.

## Great Business Benefits

- ✓ **Significant reduction** in line rental (less lines, less rental)
- ✓ **Lower call charges** (free Ireland and UK landline calls from IP Telecom)
- ✓ Connect to **IP based Phone Systems** giving more flexibility
- ✓ **Number portability** – move offices and the numbers come with you
- ✓ **Channel flexibility** – choose the number of channels you need and add more rapidly during busy periods
- ✓ **Connect from anywhere** – SIP Trunks give your business the flexibility to changes in business location

“Little or no downtime during the move - Zero ongoing maintenance. Moving to IP Telecom eliminated huge line rental and call charges. We were able to keep all our existing phone numbers with little or no downtime during the move. Zero ongoing maintenance or support costs”

**David Geoghegan | Financial Controller | United Hardware**
