

# NORTH AMERICAN GAS FORUM®

THE LEADING FORUM TO CREATE NATURAL GAS  
OPPORTUNITIES IN AN ERA OF ENERGY TRANSITION

An International Alliance Of  
Distinguished Energy Leaders

Hilton Washington DC National Mall

Washington, D.C., USA | November 8-10, 2021

## A SNAPSHOT OF THE NORTH AMERICAN GAS FORUM

At the North American Gas Forum, we always aim to include a high-level, balanced representation of leaders and industry influencers. The event is kept to key decision makers from both industry and government who are well respected. We include perspectives from across the spectrum for healthy debate and innovative dialogue. We do this in a Five-Star environment, viewed by many as the top networking functions offered and best in class. Our gala dinners, VIP cocktail receptions, champagne roundtables and lunches are always hosted in spectacular, unusual and entertaining venues - no detail is left out.

We have been through challenging times, but the natural gas industry will not cease to exist. We believe wholeheartedly in the resilience and importance of the natural gas industry and will continue to play our role in creating the dialogue necessary to continue the growth and forward movement.

*"This is the place  
to have substantial  
discussions and meet  
the industry thought  
leaders. Those who  
attend once, don't  
miss future events."*

**John Davies, CEO and  
Chairman,  
Davies Public Affairs**

## WHY THE NORTH AMERICAN GAS FORUM SHOULD BE A PRIORITY EVENT IN YOUR CALENDAR

At Energy Dialogues, we have - for over ten years now - brought together the most well-respected industry voices with thought leaders from across the value chain for exceptional debate. This year we will continue to create connection, collaboration and valuable dialogue with our highest priority being to ensure that we keep everyone safe.

Don't miss this year's opportunity to be back in person and network with senior industry leaders, regulators and experts. Join the dialogue today.

### KEY TOPICS INCLUDE

- Natural Gas and Geopolitics
- Natural Gas and Its Role In Decarbonization
- What Framework Needs To Be In Place For A Carbon Price To Make The Desired Impact?
- Natural Gas And Washington DC – Certainty And Reliability Of Decisions To Enable Infrastructure Investments
- The Interplay of Natural Gas and a Future Hydrogen Economy
