

# ENGAGE<sup>2</sup>

Discover risks from dark data and learn how to address them

## Data Risk Management Workshop

We can help:

Understand the hidden compliance risks of dark data

Assess your organisation's dark data risks with Data Risk Check

Receive an analysis and report on findings and associated risks

Learn about tools and services that can mitigate risks

Explore recommendations and next steps

**80%** of corporate data is "dark" – it's not classified, protected or governed.<sup>1</sup>

### Why Engage Squared is the right partner

- We bring the knowledge and compliance expertise
- We understand the constantly changing compliance requirements
- We balance people, process, and technology
- We help you build a robust data management strategy

### Why now?

Not long ago, managing data just meant dealing with documents and emails. Pervasive digital technology and the rapid shift to remote work have greatly expanded the information universe. Much of that data becomes stale or unused immediately after creation.

As your business-critical data expands and your workforce shifts to remote work, having an integrated approach to compliance is more important than ever.

By attending this workshop, the Engage Squared team will work with you to:

Document your compliance objectives and strategy including compliant Teams deployment and use

Show how to understand, mitigate, and protect against potential compliance risks from dark data

Demonstrate ways to accelerate your compliance journey with the latest Microsoft technologies

Provide actionable next steps based on your needs and objectives

### Why Engage Squared?

Engage Squared is a Microsoft Gold Partner, specialising in bringing people and technology together. We work in close partnership with our clients and use the tools in Office 365 to enable you to collaborate more efficiently and effectively.

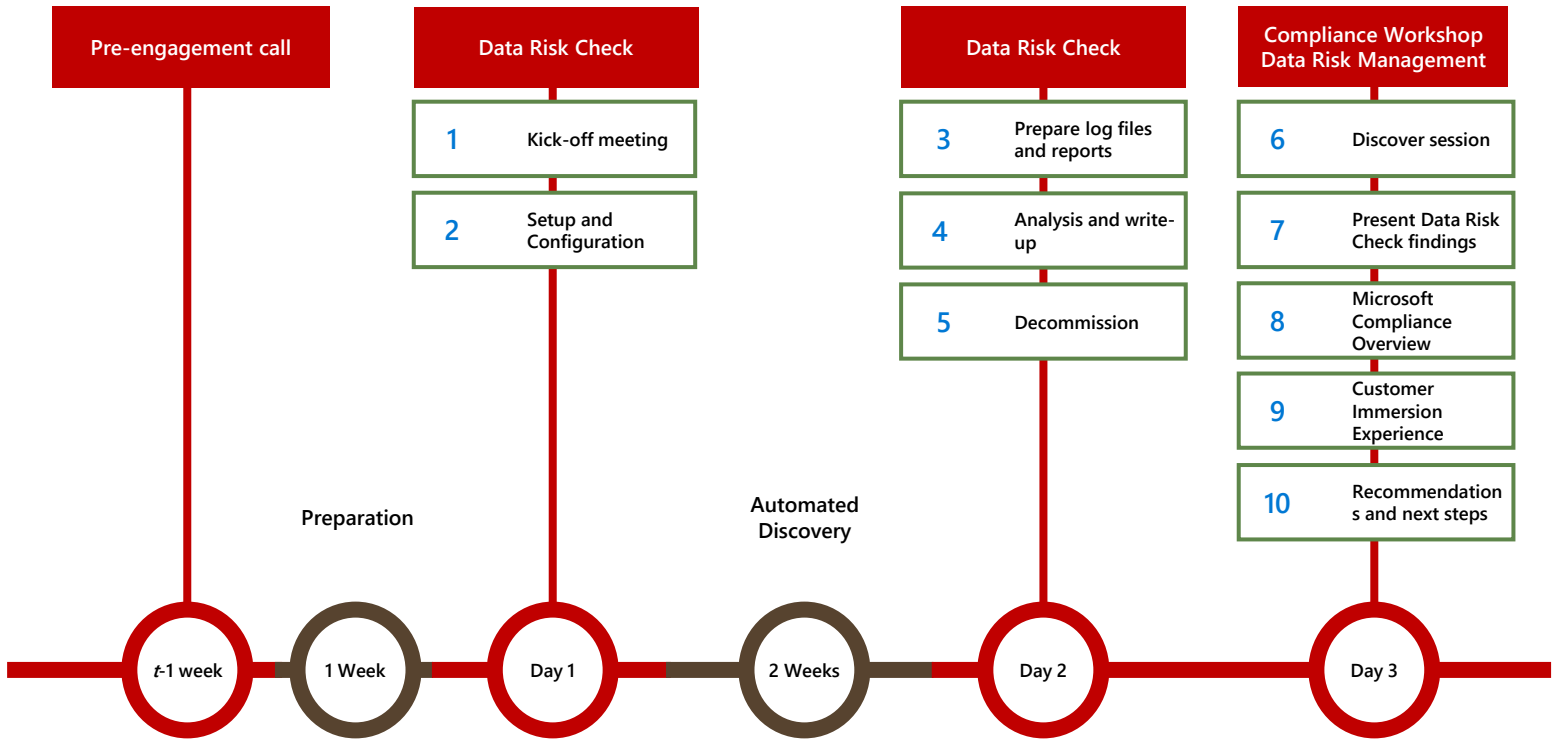

Gold Cloud Productivity  
Gold Collaboration and Content  
Gold Application Development  
Gold Communications

# Data Risk Management – 3-Day Workshop

Discover risks from dark data and learn how to address them

## Our 10 Step approach discovering and reporting on dark data compliance risks

## What to expect

By the end of this workshop, we will provide you with a:

- Data Risk Check report that includes findings and insights from the automated discovery process
- A list of recommendations and actionable next steps that will help mitigate the identified compliance risks
- Detailed assessment of your strategic objectives, influences, and priorities for compliance
- Clear look into Microsoft's approach to compliance and how it relates to your organization
- Hands-on opportunity to experience what integrated compliance looks like, including the latest tools and methods
- Set of long-term recommendations on your compliance strategy, with key initiatives and tactical next steps
