

KYRIO  TM

**We connect people, places and things
at the speed of business.**

kyrio.com

Providing Innovative Technology Services For:

Network Service Providers | Network Equipment and Device Manufacturers | Software Companies | Industry Trade Associations

Kyrio, a Subsidiary of CableLabs.

Kyrio accelerates and deploys new network innovations into the ecosystem. Backed by the power of CableLabs, Kyrio sets technology on a path to commercialization, enabling not just today's communication but tomorrow's.

Why Work with Kyrio?

You're focused on getting great products or services to market that delight your customers. So are we. Kyrio has years of expertise in enabling strong networks for the cable industry. We are here to equip you with actionable intelligence and expertise so you can make your business decisions with confidence. In the end, you'll deliver the best and most secure products in the market to your customers.

Online Services

Kyrio's location-based tools instantly match services to specific addresses through online marketplaces for both home and business.

Security Services

Kyrio custom and managed public key infrastructure (PKI) solutions integrate device identity, access control and management for large multi-vendor ecosystems.

Testing Services

Kyrio provides certification, interoperability, stability, performance, compatibility, validation and customized testing services.

What Our Customers Say

We are passionate about problem solving, sharing actionable intelligence and making connections with and for our customers.

"Kyrio and its Wi-Fi testing service played a critical role in ensuring Shaw made the right technology decisions when we rolled out a new multi-million-dollar service offering to our business customers."

—Zoran Stakic, Chief Technology Officer and SVP, Technology and Network Operations, Shaw Communications

Kyrio helps bring new innovations to market.

Since 2012, we've helped these businesses and many others get their products and services to market:
