

## Real World Testing with Kyrio

### Why Use Our Test House?

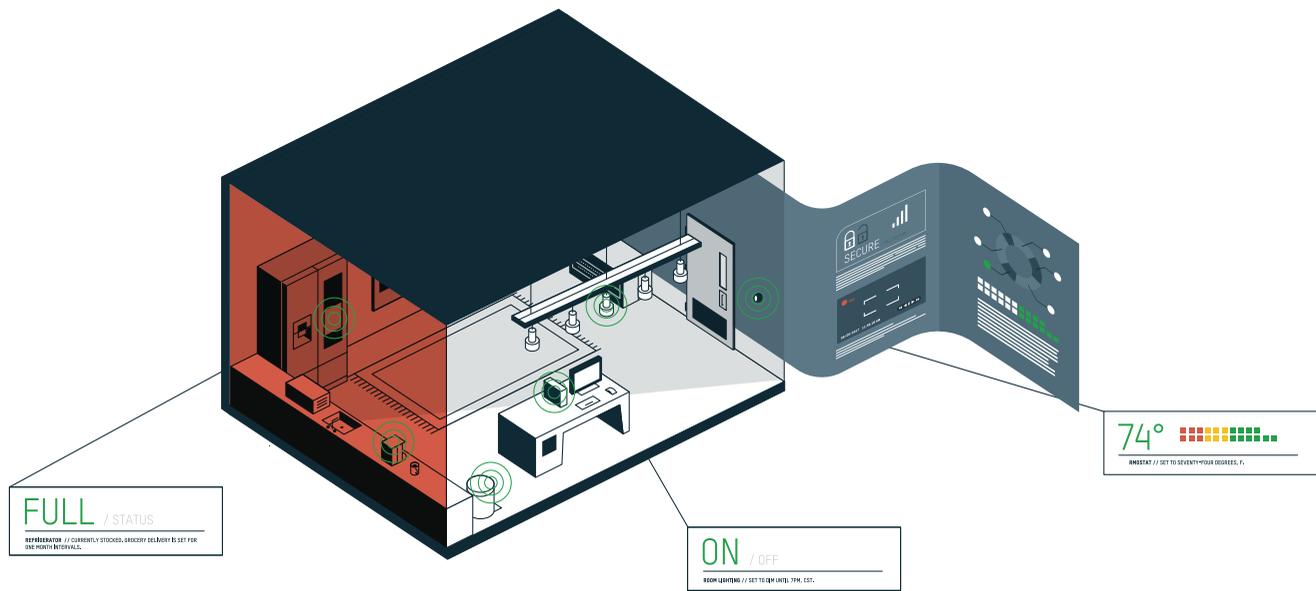

#### Types of Testing with the Kyrio Wireless House:

- **HEAT MAP CHARACTERIZATION**  
Recognize how much capacity and coverage the access point (AP) provides in its surroundings.
- **ROTATION AND EXTENDER TESTS**  
Identify antenna orientation issues with devices and extenders.
- **CUSTOMIZED LOADING TESTS**  
With 50 clients available in our 5,000 sq. ft. test house, our team can provide you with a variety of customized tests suited to your unique needs.

#### Kyrio's Wireless Test House Capabilities:

- Over-the-air traffic generation
- Customizable test scenarios
- 24/7 stability runs
- Real world simulations for connected environments

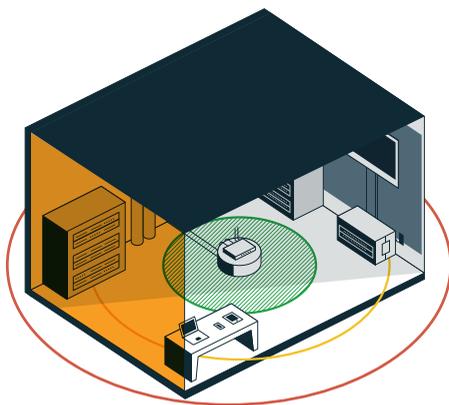

## Network Layout—Our Test House is Equipped With:

- 3.1 CMTS that enables the generation of gigabit traffic
- 50 Wi-Fi clients with a mix of 802.11 ac, n, b, and g to simulate real world scenarios
- Ixia and ByteBlowers traffic generators

## You Receive:

- Actionable intelligence into the performance of your device
- Detailed test reports
- Expert advice

## Outstanding Product Quality

Kyrio provides certification, interoperability, performance, and compatibility testing for a wide variety of networked devices.

Our skilled engineers have delivered testing services for over 20 years, and our technical expertise and unique testing environments allow us to deliver detailed results to customers to ensure that outstanding product quality is achieved at every stage.
