

Make a Statement with Exceptional Display Graphics

Print Capabilities

With remarkable equipment, technology and a superior team, we can produce up to 26,000 sq. ft. of display graphics per hour. Our quality control and full service customer satisfaction team includes talented print production crews, sewing and finishing teams, pre-flight art staff and more, all dedicated to producing the best quality display graphics. We are proud to be able to provide consistent, high quality graphics with accurate color to the G7 specification.

DYE-SUBLIMATION PRINTING

Continuous evolution and investments in futuristic, remarkably fast digital textile printers enable our production of display graphics in record time on a multitude of material types. As a result, we have the ability to print a remarkable 19,000 sq. ft. per hour via eight cutting-edge fabric printers. Our high-speed process produces vibrant six-color output over 3 meters wide. Thanks to water based inks and low consumption, the process is a fully eco-friendly printing process.

UV ROLL-TO-ROLL & FLATBED PRINTING

With seven state-of-the-art UV roll-to-roll and flatbed printers, we have the capacity to print over 7,000 sq. ft. per hour. Our UV printers provide vibrant graphics with excellent longevity on a variety of rigid and flexible substrates. This print process uses ultra violet light to cure the ink onto the substrates. We also have the capability to print white ink on a variety of materials such as plexiglass, colored sintra or other various custom applications. Talk to your sales representative for more details. Once cured, the ink is bonded to the substrate and will not require lamination. The UV print process is the perfect solution for a variety of product types including Popup mural displays, Orbital Truss displays, contour cut applications and more.

Our three high speed UV roll-to-roll printers use vibrant, durable and flexible inks allowing us to print for a variety of indoor and outdoor applications. UV printing is one of our most popular and economical solutions for banner stand graphics and outdoor tent applications.

Finishing Capabilities

We couple tenured expertise in staff with sophisticated, high-end graphic finishing and cutting equipment to ensure faster turnaround times and precise accuracy. Our print production, sewing, finishing and quality control teams are committed to producing superior, excellent quality display graphics.

DYE-SUBLIMATION FINISHING

Our highly-skilled sewing staff finishes each dye-sublimated fabric graphic by hand to ensure the perfect fit to the display frame. Fabrics are used for a number of products spanning our portable, custom modular and fabric architecture lines. Our team custom tailors all types of graphics from hanging structure, pillowcase and SEG graphics to table throws, tents and outdoor flags. Custom graphic finishing such as zippers, silicone edge beading, hemmed edges and pole pockets are available upon request.

DIGITAL CUTTING CAPABILITIES

Utilizing four state-of-the-art digital cutting and laser machines, we create fast and efficient workflows for finishing graphics on fabrics, vinyl, PVC's and rigid graphics.

All UV printed vinyl banners are finished on a state-of-the-art automatic cutter, which trims graphics up to 50 ft. per minute. The combination of our high-speed UV printers with this cutting technology enables us to provide a remarkably fast turnaround time on all FLATMAXX vinyl banner graphics.

G7 Certified

The graphics we provide are G7 certified and printed on state-of-the-art equipment.

G7 specifies the components of an image that define a similar "visual appearance" to the human eye.

G7 certification helps ensure the production of the highest quality, consistent and accurate color graphics.

G7 SPECIFICATION

- Defines a color metric definition for gray balance.
- Specifies gray balance in the midtones and image contrast from the highlights to the shadows.
- Defines the ideal colorimetric black and CMYK gray-tone curves for an image.
- Specifies a step-by-step method for calibrating proofing systems and printers to these tone curves.

Print Materials

SOFT KNIT

- 5 oz. material
- Lightweight
- Single sided
- Available up to 120" wide
- Indoor use only

Used for: Tension fabric hanging structures & custom pillowcase graphics

SUPER STRETCH

- 5.5 oz. material
- Single sided
- Available up to 120" wide
- Indoor use only

Used for: Custom pillowcase structures & complex shapes

AGILITY

- 5.5 oz. material
- Single sided
- Available up to 120" wide
- Indoor use only

Used for: Xclaim displays & custom graphic applications

BACKLIT TEXTILE

- 8 oz. material
- Single sided
- Available up to 120" wide
- Indoor use only

Used for: Custom backlit fabric applications & backlit Hopups

DISPLAY POLY

- 4 oz. material
- Single sided
- Available up to 120" wide
- Indoor use only

Used for: Table throws & runners

POWER STRETCH

- 8 oz. material
- Single sided
- Available up to 120" wide
- Indoor use only

Used for: Tension fabric systems, SEG & pillowcase graphics

OXFORD

- 8 oz. material
- Single sided
- Available up to 120" wide
- Indoor use only

Used for: Orbital Truss graphics & custom banner applications

OUTDOOR FLAG

- 4 oz. material
- Single sided
- Available up to 120" wide

Used for: Flags such as Zooms, Wind Dancers, Stowaway & custom outdoor flags

SATIN

- 4 oz. material
- Single sided
- Available up to 120" wide
- Indoor use only

Used for: Custom graphic applications

SHEER

- 2 oz. material
- Single sided
- Available up to 120" wide
- Indoor use only

Used for: Custom graphic applications

INTENSITY

- 6.5 oz. material
- Single sided
- Available up to 120" wide

Used for: Backlit SEG graphics

RESILIENCE

- 10.8 oz. material
- 100% opaque fade-resistant
- Single sided
- Available up to 126" wide
- Indoor use only

Used for: Retractable banner stands

MELINEX

- 11 mil. thickness
- Single sided
- Available up to 50" wide
- Indoor use only

Used for: Retractable & Telescopic banner graphics

FLATMAXX VINYL

- 13 oz. curl-resistant vinyl material
- 100% opaque
- Single and double sided
- Available up to 72" wide
- Indoor use only

Used for: Telescopic & freehanging banner graphics

OUTDOOR CANVAS

- 6.5 oz. material
- Single sided
- Available up to 120" wide

*Used for: Outdoor tents & inflatable columns
Water-resistant coating*

OUTDOOR SCRIM

- 13 oz. outdoor reinforced scrim for single-sided graphics
- 18 oz. outdoor reinforced scrim for double-sided graphics
- Available up to 120" wide

Used for: Outdoor, free-hanging banner graphics, Parkways & Café Barriers

ADHESIVE BACKED VINYL

- 4 oz. material
- Single sided
- Available in opaque and clear
- Available up to 54" wide

Used for: Counter and rental panels

ADHESIVE BACKED FABRIC

- 4 oz. material
- Single sided
- Available up to 54" wide

Used for: Counter and rental panels

STATIC CLING

- 7.5 mil. thickness
- Available in opaque and clear
- Available up to 63" wide

Used for: Window applications, Adheres with static

OPAQUE PVC

- 22 mil. thickness
- Single sided
- Available up to 68" wide
- Indoor use only

Used for: Pop-up panels, Orbital Truss panels & detachables

TRANSLUCENT PVC

- 22 mil. thickness
- Single sided
- Available up to 48" wide X 96" high sheets
- Indoor use only

Used for: Popup bubble panels & backlit detachables
