CLOUD TALENT SOLUTIONS

Finding the right talent for your organization is incredibly difficult and time consuming. We understand how challenging it can be to fill critical roles quickly in a scarce talent market. Drive cloud strategy and adoption with our proven cloud talent solutions.

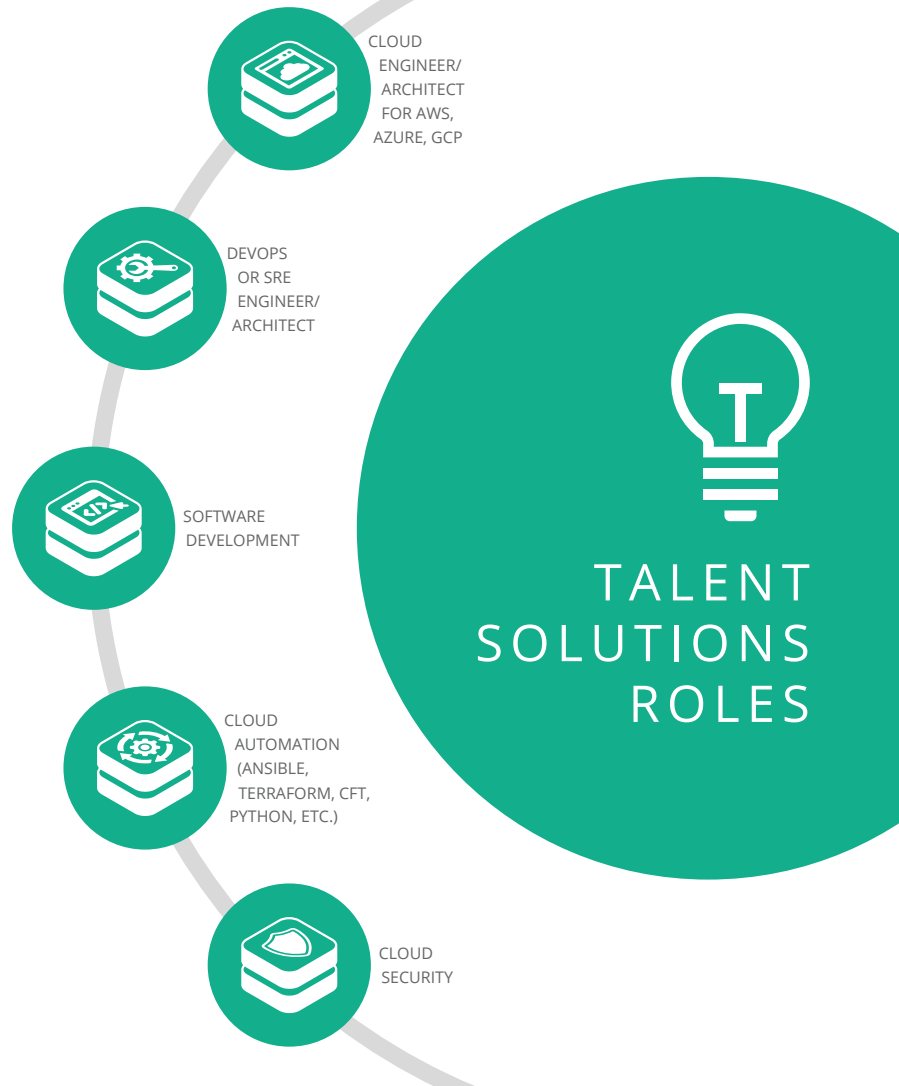

Your business demands experts that fit your culture and technical requirements within narrow time constraints. With a superior consultative approach to solving cloud recruiting challenges, the Cloud Talent Solutions (CTS) team specializes in talent identification and placement. Take advantage of Trace3's exceptional team for hands-on support and coordination of the search and placement process from beginning to end.

CTS provides two types of staffing engagements: Architect-as-a-Service (AaaS) and contracted cloud technical talent placement.

The AaaS offering assists your organization by placing highly experienced architects that will expand your team with world-class talent

Trace3's CTS team also provides premium cloud talent placement for non-architect technical roles for six months or longer to organizations seeking to accelerate cloud adoption.

Trace3's CTS team implements a proven methodology resulting in delivering top talent quickly. The CTS team has proven experience helping organizations rapidly fill roles with top cloud talent. We do this by gathering technical and cultural job requirements and supporting the creation of job descriptions. Through an iterative and collaborative process, we fine tune and adjust the sourcing strategy until the position is successfully filled.

We have a plan to help your organization design and implement innovative cloud solutions to grow faster, minimize costs, and operate your business efficiently and securely.

DRIVE CLOUD STRATEGY, ADOPTION WITH OUR PROVEN CLOUD TALENT SOLUTIONS

The CTS team can tap into elite talent networks and thoroughly screen candidates against unique job descriptions, technical requirements, and culture. We create a cloud resource roadmap, guiding talent acquisition and placement to ensure successful support of your cloud strategy. After placement, the CTS team checks in with individuals to facilitate better retention.
