TRACE3

EXECUTIVE SECURITY SERVICES

Trace3 Executive Security Services (ESS) is a team of industry professionals with deep security expertise. Our unique approach blends business, technology, and innovation to help our customers tackle todays emerging security challenges.

The ESS team is made up of former CISO's, security architects, and advisors who strive to enable security leaders with next generation solutions focused on process improvements. Given the shortfall of trained security professionals in the industry, Trace3 is the answer to help organizations better understand the tools they have, the people they love, and the processes that prevent the next data breach.

WHY CLIENTS CHOOSE TRACE3 ESS

Trace3 is uniquely positioned to bring together business, technology, and security to any conversation. Our experts have on average 15 years of experience architecting and deploying next-generation adaptive security solutions. We have a proven track record in augmenting and improving customer security programs and taking stakeholder and board conversations to the next level.

SECURITY ADVISORY AND STRATEGIC CONSULTING

We are all good at something, but often there are gaps in our knowledge, and we need to look to others for advice. With limited staff and the ever-growing threat of compromise, strategic security consulting can give your organization the edge it needs to defend against attacks.

SECURITY PROGRAM MATURITY AND TOOLS RATIONALIZATIONS

Better understand how mature your security program is and what is needed to bring it to the next level. Do you know if the tools your organization invested in are mature, deployed, and operationalized?

VC BRIEFINGS AND CISO INNOVATION COMMUNITY

Understanding who the emerging security platforms are and what they can do for your organization is of paramount importance.

VCISO SERVICES

Organizations need security leadership, whether that means augmenting existing capabilities or stepping in to lead the day to day; Trace3 can help.

SECURITY UNDERGROUND

The mainstream comes for us all, but we must go willingly to the underground to stay one step ahead of our adversaries.

SECURITY AWARENESS TRAINING

Evolve your security awareness training by focusing on what matters most.
