21.4 Partner Enablement Plan

.

Quick Housekeeping notes

- Please enter your question in the Q&A box.
- We will address the questions along the way, at the end of the presentation or by follow up email.

FAQ: Is this webinar recorded?

Yes, this session is recorded and will be posted on the same page where you registered for attending.

•	Q&A		
	You asked: How do you like Zoom so far?		04:06 PM
	Aidan Crosbie would like to answer this question live	a.	
	Please input your question		
	Send Anonymously		Send

Automate Tests & Test Automations

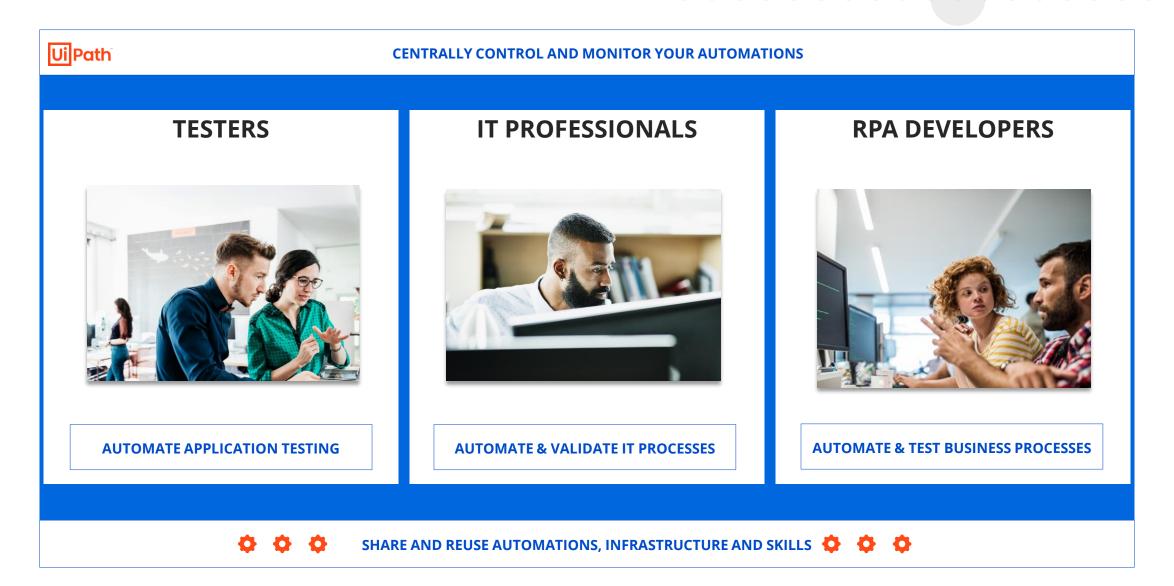

Execute and Monitor Automations

- ✓ Production-grade automation, AI and orchestration brought to Testing
- ✓ Automate any UI or API technology
- ✓ Share and reuse automations with the entire enterprise
- Seamlessly integrates into your ALM and DevOps toolchain

One automation platform for Enterprise Testing

UiPath Test Suite 2021.4 Technical Webinar

Agenda

Test Suite 2020.10 Features Recap

Studio Pro

- Test Results and Verification Enhancements
- Test Data Management

RPA Testing

- Mocking
- Activity Coverage Panel Enhancements

Test Orchestration

- Test Data Queues
- Test Sets from Test Cases

Test Manager

- Authorization & Rights Management
- Executing Tests from Test Manager
- Custom Fields
- Attachment Support & Filter Search
- New Dashboard KPIs
- Azure DevOps ALM Integration
- SAP Solution Manager Integration

CI/CD Integration

• Azure DevOps Plugin

SAP Automation

- Modern SAP App Support
- WinGui Activity Pack

Mobile Device Automation

- Execution Timeline
- Device Mirroring
- Anchors & Images
- Variables
- Quick Filters
- Visual Tree

Test Suite 2021.4 What's New?

Studio Pro

- Test Activities Enhancements
- Data Driven Test Cases Improvements
- Workflow Analyzer Rules for Test Automation
- Test Manager Integration to Studio Improvement

RPA Testing

- Mocking Enhancements
- Activity Coverage Panel Enhancements

Test Orchestration

- Run Test Cases on Specific Robot/ Machine
- Test Configuration Parameters
- Execution Details Enhancements
- Audit Support

Test Manager

- Apollo Design
- Multi Tenancy
- Reporting Enhancements
- Integration SDK

.

CI/CD Integration

- Run Job
- Deploy Assets
- Improved Error Handling & Logging
- Localization

SAP Automation

- Latest SAP WinGui Support 7.7
- SAP Accelerators
- ALV Table Support

Mobile Device Automation

Custom Element Action

UiPath Reboot[™]

Test Suite 2021.4 Features Walkthrough

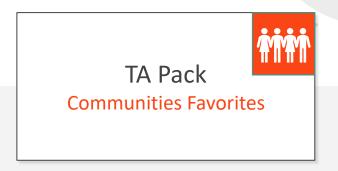

Testing Activities

Adaptive Orchestrator Title

The title shown in Orchestrator is not only Verification Passed/Failed anymore but carries the title of the Verification Activity. If dynamic values are needed, this can even be customized further.

Buffer the Outcome

To react on a failed/passed result with e.g. special reporting (like a Mail or a File-Upload), the use can buffer the outcome of the Verify Activity as a Boolean and react on it.

Custom Messages

Most highly requested: Customize the Output Message of a Verification within the Verify Activity. This, in addition, can even be done on a global level for the project.

Select Data from Excel – Data Driven Test Case

What is it?

Select specific columns or rows from your Excel file to import as Test Data.

Why is it required?

Test Data file might be in a raw format with Columns/ rows that might not be required for Testing. We now provide a possibility to select rows/ columns while importing.

9	Imp	ort Data	a Variati	on Source				×
	Test	Data	LoanD)ata.xlsx				~

			OK	Cancel	1

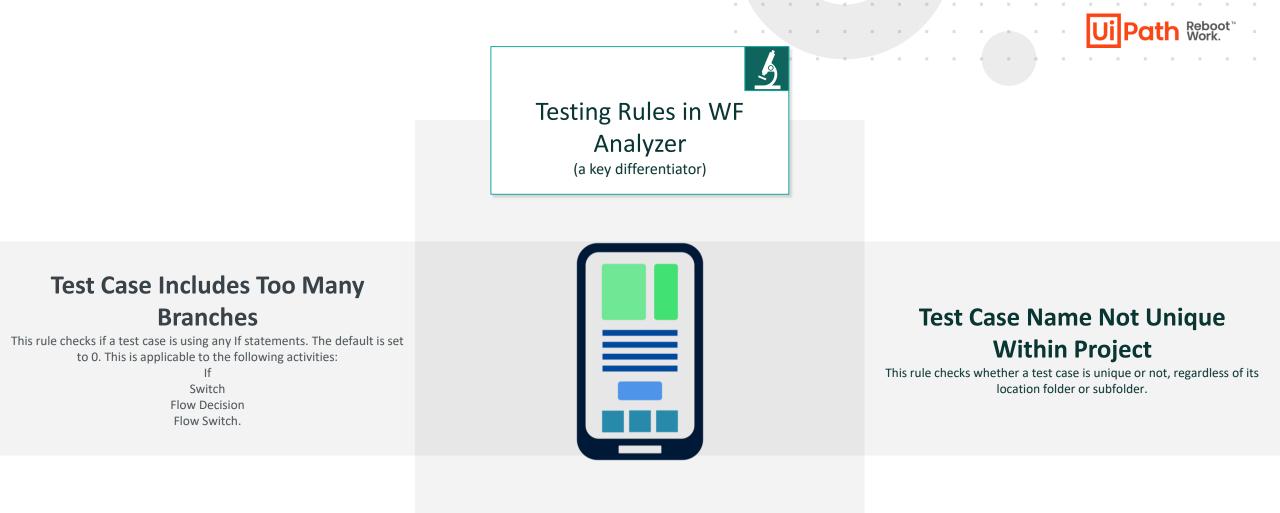

Test Manager Connected

This rule checks for RPA test cases that are not linked to a test case in Test Manager..

Test Case / Workflow Too Complex

This rule checks for test case and workflow files that exceed a specified number of steps (activities). The default number of steps is set to 30.

Test Case Naming Convention Broken

This rule checks for test cases that match a specific RegEx. By default, the RegEx value is empty.

Test Manager Integration to Studio

What is it?

Speed up cross-tool operations by reducing the number of steps needed to:

- Link automation
- Assign Tests to requirements

Ui Project Settings			×

Path Reboot

Run Test Cases on specific Robot/Machine

What is it? Run single Test Cases on a dedicated machine to analyze their behaviour in a certain environment

Why is it required?

Analyzing test results can be hard if your TC fails due to your execution environment. By running it on a specific robot, customers will be able to track down issues easier.

Test Sets	Test Schedules

UilPath Reboot

Test Configuration Parameters

What is it?

Parameterize your entire Test Set at a single location. Create your Test Cases once & run them on different platforms.

Why is it required?

When starting a Test Set with several hundreds of Test Cases, it would not be very convenient, to set the according argument values for each of them.

Name *	
Smoke Test	
Description	
User Any user	~
Select Projects Arguments	
Add a new argument	
AccountNo	-
UserID	
:= There are no arguments defined	
CLOSE BACK NEXT SAVE	

.

Path Reboot

Show Data Variation in Execution Details

What is it?

Any Test Case is driven by data, which makes it crucial to tie the used data during the test run with the actual test result. Orchestrator now provides a detailed view on the used test data

Execution details

Project: TestSetConfiguration Test Case: Apply for a loan Version: 1.0.3 Machine: LAPTOP-SHV903FO Robot: madhurima.m@uipath.com-unattended Start Time: 04/06/2021 6:25:40 PM End Time: 04/06/2021 6:25:45 PM Result: Failed Input Values: {"AccountNo":"37551489"} Output Values: {"LoanID":"34353445"} Info:

Job completed

Screenshots

ANo job execution media found.

CLOSE

Attachment Support

What is it?

Attach artefacts to your test result. Those attached documents will then be permanently stored within the Test Case Result

Why is it required?

Customers, especially in regulated industries must comply to certain auditing/ reporting rules. Among others, this includes documenting test results via screenshots, documents generated as an output of a test run.

Execution details		
Project: TestSetConfiguration Test Case: Apply for a loan Version: 1.0.6 Machine: LAPTOP-SHV903FO Robot: madhurima.m@uipath.com-unattended Start Time: 04/07/2021 11:13:36 AM End Time: 04/07/2021 11:14:00 AM Result: Failed Input Values: {"UserID":null} Output Values: {"LoanID":"34353445"} Info:

.

CI/CD Integration

Run Job

 Automatically run a certain job on Orchestrator as part of your CI/CD pipeline from Azure DevOps or Jenkins

Deploy Assets to Orchestrator

 Create or update assets on Orchestrator automatically as a part of CI/CD pipeline from Azure DevOps or Jenkins

Improved Error Handling and Logging

 Debugging configuration issues can be cumbersome. Therefore, we have improved our logging mechanism to provide meaningful and actionable messages.

Localization

• Everyone feels comfortable to talk in their own language, hence we have added localization to our CI plugins

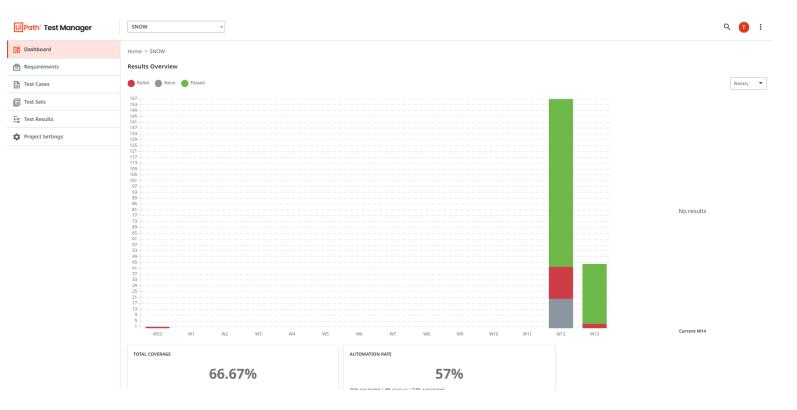

Apollo Design

What is it?

Harmonize the visual- and functional design of Test Manager with the remaining toolset of UiPath in order to provide outstanding and consistent product experience.

Multi Tenancy

What is it?

Enables

- Segregation
 Separate data and users
- Organization Model organizational structure

Good to know

- No cross-tenant users
- Tenant/ User management via Orchestrator

Test Manager Instance	Orchestrator Instance
Tenant 1	Tenant 1
^	<u> </u>
Tenant 2	Tenant 2
<u>^</u>	<u> </u>
Tenant 3	Tenant 3
<u>***</u> ******	<u>***</u> *

.

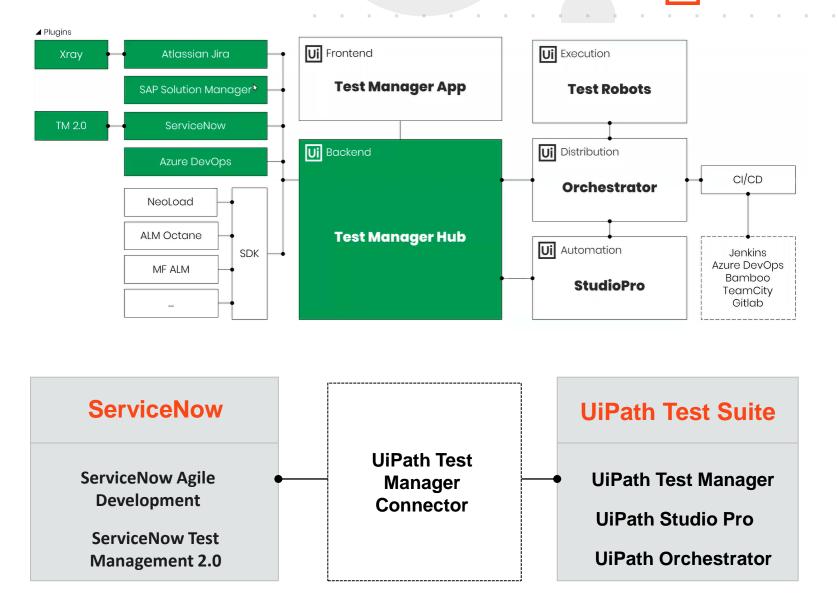

ServiceNow Connector

What is it?

UiPath Test Manager for ServiceNow seamlessly integrates testing with your application and RPA development

projects. Providing the ability to directly automate ServiceNow tests with UiPath Studio Pro enriches your testing portfolio with enterprise grade UiPath automation capabilities

To know more about this connector, click here

Path Reboot" Work.

Reporting Enhancements

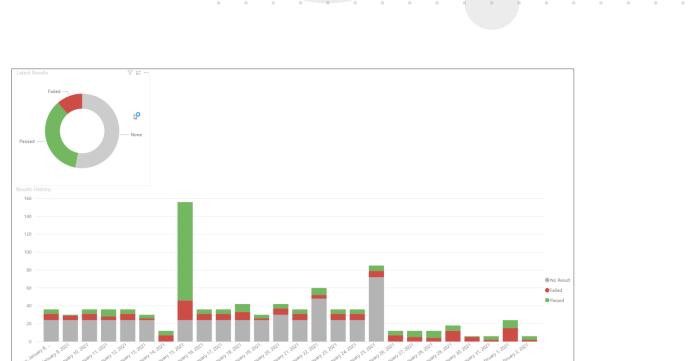

What is it?

Enriched data source along with a set of report templates for Power BI.

Why is it required?

Reporting is highly complex and specific to customer scenarios.

Customers prefer feature-rich solutions from top vendors over proprietary single-tool solutions.

Reboot[®] Work

UiPath Supports latest SAP WinGui 7.70

What is it?

UiPath supports the following versions of SAP WinGUI for Windows 7 and Windows 10, for both architecture types (32-bit and 64-bit) and for both logon tools SAP Logon and SAP Logon Pad.

SAP WinGUI 7.70 (newcomer to the SAP WinGUI family)
SAP WinGUI 7.60
SAP WinGUI 7.50
SAP WinGUI 7.40

SAP Accelerators

What is it?

SAP Accelerators can be downloaded directly from **UiPath Marketplace** and contain ready to go workflows for the most used transactions and applications in SAP ECC and SAP S/4HANA.

- 200+ out-of-the-box automations
- **30%** faster robot implementation time
- 50 70% reduction in processing time

Reboot[®] Work

Please note that there is no official UiPath support --> ONLY COMMUNITY SUPPORT !!!

Which Accelerators are available?

<u>UiPath Accelerator for SAP S/4HANA for Sales</u> <u>UiPath Accelerator for SAP S/4HANA for Finance</u> <u>UiPath Accelerator for SAP S/4HANA for Procurement</u> <u>UiPath Accelerator for SAP S/4HANA for Manufacturing</u> <u>UiPath Accelerator for SAP S/4HANA for Basis</u> <u>Administration</u>

<u>UiPath Accelerator for SAP ECC for Sales</u> <u>UiPath Accelerator for SAP ECC for Finance</u> <u>UiPath Accelerator for SAP ECC for Procurement</u> <u>UiPath Accelerator for SAP ECC for Manufacturing</u> UiPath Accelerator for SAP ECC for Basis Administration

Business Benefits

- Flatten the learning curve by using pre-built automations
- Significantly reduce effort, cost, and errors in automation implementation
- Easy entry in SAP automation projects
- Achieve higher automation rate
- Adopt best practices for UiPath automation
- Simply download from UiPath Marketplace

Available in English and Japanese

Please note that there is no official UiPath support --> ONLY COMMUNITY SUPPORT !!!
