

CYLINDER SERVICE EXCHANGE PROGRAM

www.berendsen.com.au

ABOUT US

When it comes to keeping your heavy earthmoving equipment moving, Berendsen is an obvious choice. Berendsen has specialised in the refurbishment of hydraulic cylinders for over 25 years and has the facilities, equipment and experience to keep your heavy mobile equipment working at peak efficiency.

With equipment downtime continuing to be a source of inconvenience and unnecessary expense, we have further developed our service and repair offering to include a cylinder service exchange program.

THE PROGRAM

Convenience is realised when you can economically replace worn hydraulic cylinders without any major downtime and without having to carry your own spares inventory.

Recognising the need for a better solution, we developed our Cylinder Service Exchange Program, which sees us immediately replacing your worn cylinder with a cylinder from our stocked range of fully-refurbished cylinders, thereby eliminating the need to wait for your worn cylinder to be repaired.

OUR REFURBISHMENT PROCESS

Each cylinder is rigorously assessed, including bore, piston, gland and rod wear, crack detection, chrome hardness and thickness, and surface finish.

Welding processes are employed to reclaim worn clevis eyes, glands and other components before machining the part to original tolerances.

Piston rods are hard chrome plated at our chrome plating facilities, whilst barrels are honed to original specified condition in our honing stations.

Original spare parts and powerful assembly benches, equipped with hydraulic nut tensioning devices, are employed to correctly assemble cylinders to required torque specifications.

Cylinder integrity is verified on our purpose-built test rigs before painting to factory freshness in our in-house paint shops to complete the end-to-end restoration process.

PROGRAM ADVANTAGES

- ✓ Minimal equipment downtime
- ✓ No need to purchase expensive new equipment when you can't wait for your worn cylinder to be repaired
- ✓ Economical - you only pay the cost to repair your worn cylinder
- ✓ Peace of mind - each replacement cylinder has been expertly refurbished to original specified tolerance and is covered by Berendsen's warranty
- ✓ In the case of a cylinder being deemed unrepairable, there is the option to purchase the exchange cylinder

SERVICE EXCHANGE CYLINDER RANGE

Manufacturer	Equipment Type	Model	Cylinder Type	OEM Part Number	
Caterpillar	Rigid Dump Truck	775	F	775F Rear Suspension	SX-223-4394

SIX REASONS TO CHOOSE BERENDSEN

- ## 1 An industry leader with extensive mining experience

Berendsen's network of 9 branches nationwide have been proudly served industries across Australia for over 25 years, forging an unquestionable reputation as a leading hydraulics services company.
- ## 2 We offer a range of exchange cylinders across Australia

Our cylinder exchange range includes cylinders for Caterpillar, Hitachi and Komatsu dozers, dump trucks and more. We are constantly adding to our stock of exchange cylinders, providing more customers with access to our exchange service.
- ## 3 No exchange fees – you only pay for repair

Saving time doesn't cost you more. Simply swap out your worn cylinder for a matching, fully reconditioned unit and pay only for the cost of repairing the old cylinder.
- ## 4 All exchange cylinders are restored to OEM specifications

Our highly skilled technicians pride themselves on returning all repaired cylinders to OEM specifications. Berendsen's modern and fully equipped repair centres are designed to help you restore complete confidence in your equipment.
- ## 5 Reconditioned cylinders are bench-tested for performance

Cylinder integrity is verified at our sophisticated hydraulic testing stations before the end-to-end restoration process is complete and the cylinder is returned to the shelf to await the next customer.
- ## 6 Exchange cylinders carry Berendsen's quality warranty

Enjoy the peace of mind that comes with choosing an established company with excellent quality standards. We specialise in cylinder refurbishment, and we stand by our reputation with a warranty of quality.

- 1 Contact your local branch to confirm that the cylinder is available.
- 2 If the cylinder that you require is available from our stock we will ask you to provide a Purchase Order comprised of;
 - a. a purchase order line authorising us to charge the repair of your worn cylinder
 - b. a purchase order line authorising us to charge a refundable core depositA core deposit is taken as security in the event that you are unable to send your worn cylinder to us, or if your cylinder is not acceptable for repair*. If you are a COD customer we will ask you to pay the security deposit in advance.
- 3 When we receive your purchase order we will dispatch our service exchange cylinder according to your written instructions.
- 4 We will confirm via email which Berendsen location you should send your worn cylinder to.

* When we have received your worn cylinder we will inspect the cylinder to confirm that it is acceptable for repair. Generally, cylinders are acceptable for repair when they are;

- Fully assembled and complete
- Not cracked or broken
- Not excessively corroded or pitted
- Not fire damaged
- Have not been previously repaired with unsound repair methods
- Are of an acceptable OEM part number

If a cylinder is deemed unacceptable for repair the core deposit amount will be charged. If the transport frame is not returned the replacement cost of the frame is also charged.

If your worn cylinder is acceptable for repair we will provide a repair report detailing the repairs required to bring your worn cylinder back to original tolerances.

Have more questions about our program?

Berendsen Fluid Power also repair all brands of hydraulic equipment at our nine branches nationwide.

Feel free to give our experienced team a call on 1800 814 411.
