

DIGITAL DOORSIGN

What is DATABEATdoorsign?

DATABEATdoorsign is a cost-effective solution that gives you a complete overview of your meeting rooms, offices, and resources availability. DATABEATdoorsign integrates seamlessly with your calendar system to automatically collect and display the latest information - this helps you avoid double-booked resources. DATABEATdoorsign can be used with Microsoft 365, Microsoft Exchange Server, or Google G Suite. Our solution makes it easy to adjust the doorsign to match your brand and surroundings. You can insert pictures, video and graphics to suit your needs or customize every detail with your own design template. This strengthens the brand identity, both internally and externally.

Benefits with DATABEATdoorsign

Cost effective

With a fixed price per unit, Doorsign is easily priced and creates immediate value for your business

Customized

Add your own photos and videos to make your brand visible through doorsign with a few clicks

Updates in real time

Doorsign automatically synchronizes with your calendar and allows you to manage booking of rooms on the go

Easy to use

Doorsign is easy to use and you do not need any specialist training

Several Integration Options

Doorsign integrates with Office 365, Exchange services and G-suite calendar – avoid double bookings

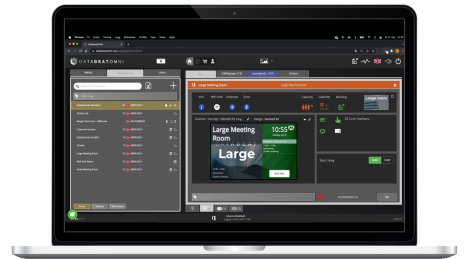

Quick set up

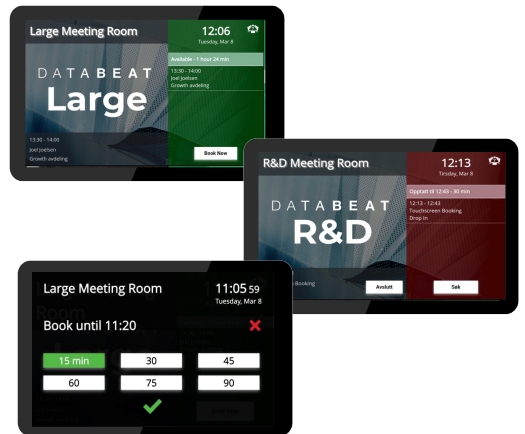

Doorsign is easy to set up, and no specialist is needed

DATABEATdoorsign

- DATABEATdoorsign can display calendar information from meeting rooms, people and other resources. You define the information to be displayed yourself with your own design template and access level

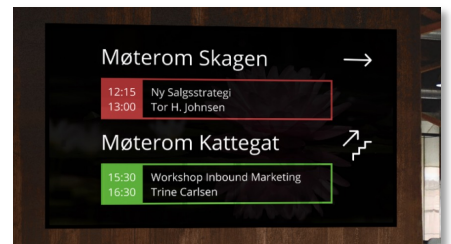

- Create and manage your digital doorsigns quickly and easily in DatabeatOMNI, the same place where you also manage your digital signage information screens and other "TV-channels".

- Get an overview of several meeting rooms and resources, on one single screen with Doorsign Overview. Perfect for lobby and reception screens.

- Publish content, as pictures, videos or even webpages as background for your digital doorsigns.

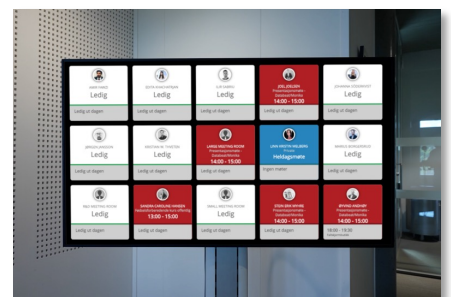

- Use a default template, or create your own template customized to your profile and design.

- Set up your rules for meeting check-in and confirmation at meeting rooms on the touch screen.

- Book a meeting and select duration directly on the touch screen.

- DATABEATdoorsign can also be used as a signpost.

- Possibility of one or more screens per meeting room.
