# Top 5 Reasons Courier Express Parcel Carriers Use Trimble MAPS

1 | WE PROVIDE SAFE, COMPLIANT, AND OPTIMIZED COMMERCIAL NAVIGATION

Our voice guided navigation solution takes into account vehicle dimensions, height, weight, and load restrictions, road attributes, traffic, and more when generating routes. We'll even optimize the stop order so drivers can get more jobs done.

Keep drivers safe and efficient.

2 | WE SUPPORT OPERATIONAL CONSISTENCY

Our solutions are rooted in the same commercial map data and trusted routing engine, ensuring consistent distance and route calculation from the back office to the vehicle. Even better - it seamlessly integrates with your mobile workflow

Designed to keep business running smoothly.

3 | WE HELP YOU UTILISE YOUR ASSETS BETTER

Our tools allow you to manage all fleet data centrally in the back-office, get alerts when drivers go out of route, and view planned vs. actual performance to ensure that the optimal route is followed.

Have control where you need it most.

4 | WE UNDERSTAND THAT CUSTOMERS HAVE SPECIFIC DELIVERY NEEDS

Our solutions work to enhance facilities, depots or sites with geofences to provide drivers with accurate routing to the final destination. We also support time window optimization, allowing you to generate routes that incorporate pre-defined SLAs.

Improve first-time delivery success.

5 | WE AUTOMATE REAL-TIME VISIBILITY OF ETAS

Reduce calls to drivers, get ahead of service failures, and share dynamic ETAs directly with customers that take into account real-time conditions, like traffic and weather.

Happy customers, happy you.
