

HAVE A SUCCESSFUL PEAK

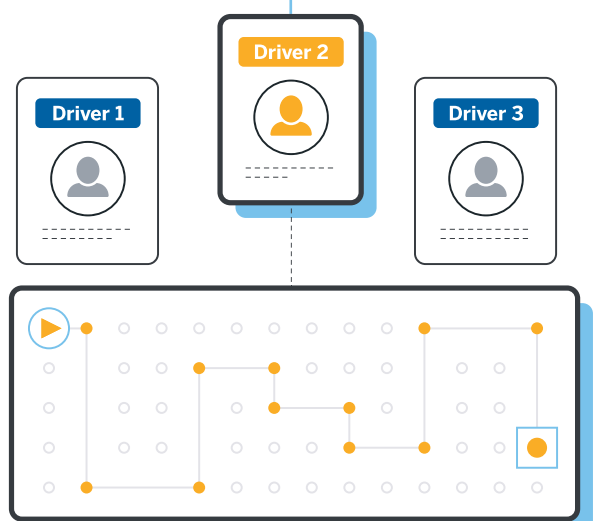

with Scalable Technology That is Designed for the Last-Mile

Our **intelligent technology** has been enhanced through over **40 years of experience** working directly with leading Courier, Express, and Parcel (CEP) companies **across the globe**.

Helping You Under the Roof

Refining the operational plan earlier in the day means that you can ensure that the right vehicles, people and volumes are aligned.

- Maximise first-time delivery success
- Equip and prepare your less experienced drivers with accurate routes
- Get your most experienced drivers on the road quicker, with the most time-sensitive, high priority/service level products
- Retain loyal, motivated drivers by giving them manageable volumes, smoother operational loading processes and more certainty on their routes

Assisting You on the Road

Provide visibility and communicate accurate arrival times to customers to drive up customer satisfaction, as well as loyalty.

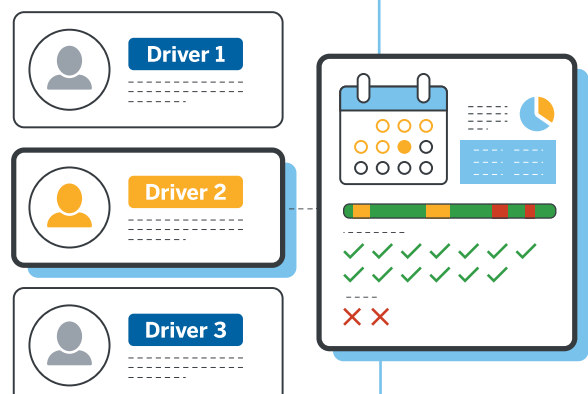

- Give commercial grade navigation that ensures drivers arrive at the exact location
- Add more capacity to your network in hard to reach geographies
- Flexible licensing models to have your network operationally ready for the next peak period
- Provide real-time alerts of driver trip progress to reduce calls to customer service

Supporting You Back in the Depot

Addressing daily planning to execution performance through data-driven debriefs.

- Analyse depot wide performance over custom date ranges
- Reconfigure plans focused on AM, PM and evening work
- Build the bridge between systems, debrief and driver knowledge
- Deliver certainty into the operation supported by real-world feedback
