

COPILOT[®] SAFETY FEATURE GUIDE

SLOWDOWN AHEAD
Traffic slowdown approaching
Please use caution

Traffic Slowdown Alert

Proactively alert drivers of a sudden traffic slowdown ahead with **visual** and **audible** notifications to prevent safety risks and accidents.

ALTERNATE ROUTE
Avoids traffic

Quick at-a-glance design and driver safety view to reduce unsafe driver distraction

SPEED 57 MPH
Speed Limit 45 MPH

Speed and Roll Over Warnings

Give drivers visual warning of **excessive speed** over the posted limit as well as **advance notice of upcoming turns** that can cause a roll over if taken too fast.

ROLL OVER ALERT
Slow down for turn

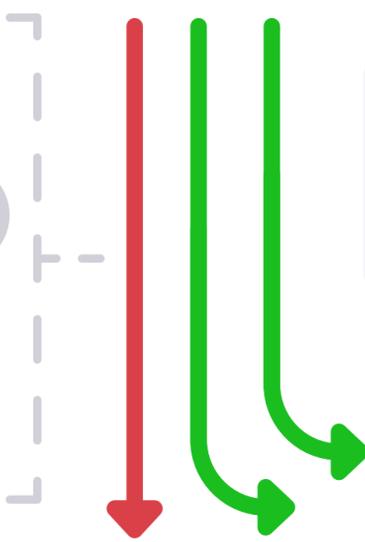

Vehicle Profiles

Remotely manage and assign **vehicle routing profiles** in the back office to ensure trucks adhere to **legal, planned routes** as well as notify the driver if they turn onto restricted roads.

Lane Assist

Help drivers safely maneuver lane changes with **real road signage** and **lane assist** visuals.

Prevent driver interaction when the vehicle is in motion with Motion Lock controls

Offline Navigation

Drivers are able to access **reliable routing** and maps even when they're **out of coverage** areas.

OFFLINE MODE
Route Updated
