

DO YOU NEED A KITCHEN REMODEL?

THINKING ABOUT REMODELING YOUR KITCHEN?

Whether your kitchen just needs a facelift or the whole first floor needs an overhaul – not all kitchen remodels are alike. This assessment can help you figure out where you might fall on the kitchen remodeling spectrum.

HOW IT WORKS As you read through the questions, choose which number best fits your kitchen situation and add the number to the box. If none of the answers match your project, leave the box blank. At the end, tally up the total number you've made, and read the assessment based on that number.

Let's get started!

HOW MUCH OF A CHANGE DO YOU NEED?

What isn't working? Choose your biggest problem.

RESULTS

Add together your points from each question to get a total score.

For example, if you selected all 5s, your total score would be 45.

If you selected 1 on three questions and 2 on six questions, your total score would be 15.

Find the response that matches your total score below to see what type of remodel we would recommend for your specific project.

9-21 A new look & minor layout changes may get you most of the items on your wish list.

22-33 You may not need an addition or to knock down a wall, but your kitchen may work better with a significant layout change.

34-45 An addition or changes to the overall first floor layout may be needed to get your kitchen to work better for you.
