

**Multi Account Manager**

# Control Multiple Accounts

with Valutrades  
MAM Software

With Valutrades' MetaFX MAM software, money managers can command all of their trading accounts at once.

**What is a MAM account?**

MAM (Multi Account Manager) is state of the art software that lets you manage multiple MT4 or MT5 accounts simultaneously. It's the ideal solution for money managers who need to control multiple trading accounts from a single trading platform.

**Key Features and Benefits of MAM:**

- Multiple trade allocation types, including by equity, balance, percentage, or lot.
- Add and remove accounts in real-time with no need to close positions or wait for server restarts
- Change allocations at any time with no restrictions.
- Commission markup, spread markup, annual fees and profit share settings are all available.
- Executing trades is as simple as using a regular MT4 or MT5 terminal.
- No restrictions on any trading style.
- All allocations and reporting is in realtime.
- MetaFX MAM Manager platform is available to all money managers to control settings themselves.
- Setup completed within 24 business hours.

## Steps to to Registering for MAM Manager

[Get Access to MAM](#)

1. Register for a live account clients.
2. Email us at: [support@valutrades.com](mailto:support@valutrades.com) requesting to be setup as a MAM manager confirming the currency, demo or live environment, server (HK or NY) and platform (MT4 vs MT5).
3. Received LPOA (limited power of attorney) and FD (fee disclosure) documents to share with clients.

In order for you to become a MAM, all we require is that you have a live account at Valutrades. We do not require any special qualifications or additional documentation.
