

Benefits

- Operational Time Savings
- Dedicated Cyber Security Analyst
- Policy, Procedure, and Process
- Asset Discovery
- Asset Classification
- Visibility of Vulnerabilities
- Remediation Tracking and Verification
- Protect Assets
- Manage and Report Risk

Service Overview

DigitalEra's Vulnerability Management Program continually identifies, evaluates, and corrects security vulnerabilities to help protect the organizations' attack surface. The service provides program development, asset discovery, and classification, continuous monitoring, recommended mitigation, recommended remediation, and tracks risk for formal acceptance for the organization.

DigitalEra's Vulnerability Management Program gives you the freedom to focus on your business while placing Vulnerability Management in our expert hands.

How it Works

- Discover – Discover and identify every hardware and software asset across all of your computing environments.
- Assess – Identify vulnerabilities, misconfigurations, and other weaknesses on organization assets.
- Prioritize – Prioritize remediation, using a risk-based approach, based on exploit availability, threat intelligence, and asset criticality.
- Remediate – Provide clear remediation instructions to IT operations staff with expectations and apply the remediation or mitigate using compensating controls as an alternative.
- Measure – Validate and track time to assess and remediate. Track metrics against compliance standards and report the information with the organization.

VULNERABILITY MANAGEMENT PACKAGES

Service	Vulnerability Scans	Vulnerability Program
<p>Vulnerability Scanning</p> <ul style="list-style-type: none"> • Internal Scans • External Scans • Remediation Scans 	✓	✓
