

PLANT MANAGEMENT PLATFORM

The Enterprise Solution For Plant Production, Quality, & Compliance

IMPROVE YIELD

Leverage real-time SPC and operational data on the plant floor with mobile, workstation, and web applications to make better, faster decisions that reduce waste and rework.

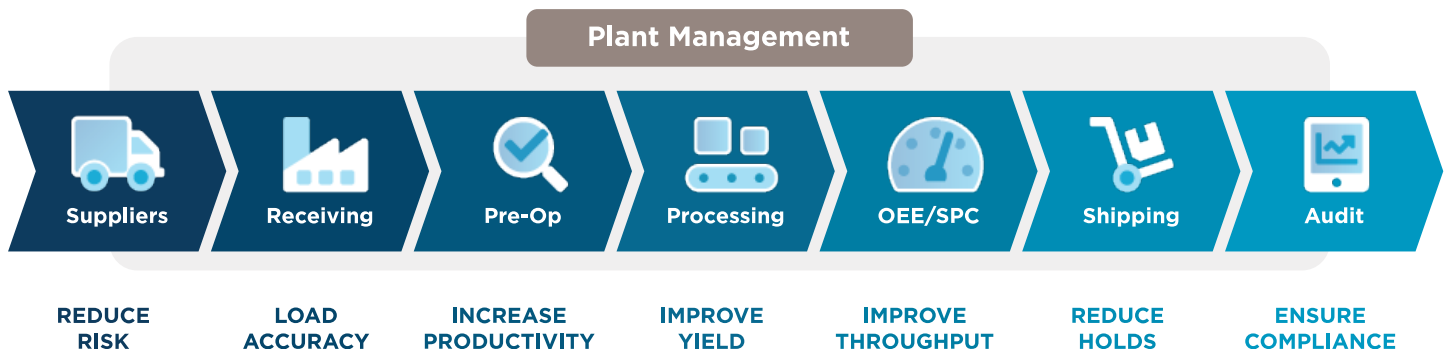

MAXIMIZE PRODUCTIVITY

Monitor and identify production issues to improve on-time startups and reduce unplanned downtime with real-time OEE and operational data across every line, shift, and plant.

ENSURE COMPLIANCE

Digitize your safety and compliance programs with easy-to-use mobile forms linked to your regulatory programs to eliminate paper, automate your audits, and ensure compliance.

Put The Performance Of Your Plant In The Palm Of Your Hand

Production Manager

SafetyChain Production Manager is a plant productivity solution that analyzes real-time operation, human collected, and equipment data to help process manufacturers maximize the performance of their facilities. Capture real-time SPC and OEE data to optimize outputs for every line, shift, and plant from a single solution.

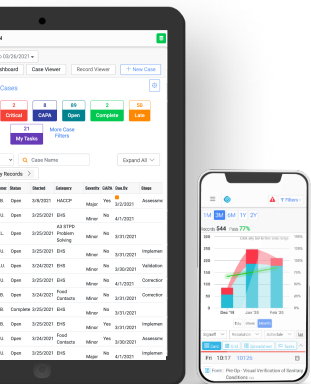

- ✓ Integrated OEE Dashboard
- ✓ Real-Time Spec Verification
- ✓ Live SPC Charts
- ✓ Equipment Maintenance

Quality Manager

SafetyChain Quality Manager puts busy quality teams in control of their yield, costs, and program compliance with a fully-integrated Quality Management Software (QMS) solution. Real-time spec verification with SPC, paperless quality checks, automated audits, fully digital CAPA & RCA, and even customer complaint management, Finally, a 360 degree view of quality from audits to SPC, checks, and more.

- ✓ Digital QMS, CAPA, & RCA
- ✓ SPC Analytics
- ✓ Facility Audit Management
- ✓ Program Management (ISO, GFSI, SQF, HACCP)
- ✓ Customer Complaints

Supplier Manager

SafetyChain Supplier Manager provides a cloud-based, centralized solution that makes managing supplier compliance faster, easier, and more effective. From facility audits and scoring to user-friendly supplier portals and scorecarding, SafetyChain gives your suppliers and audit team a single tool to streamline their processes, reduce risk, and improve overall performance.

- ✓ Supplier Compliance & Scorecard
- ✓ Document Tracking & Alerts
- ✓ Supplier Audit Management
- ✓ Supplier Risk Assessment

Integrate & Automate All Data

SafetyChain is built to capture plant production, quality, and compliance data through mobile forms and Integration APIs. From sending data via industrial automation from sensors, PLCs, and SCADA systems to accessing SafetyChain via Single Sign On (SSO), we offer a variety of services to support these technical needs.

- ✓ Data Automation API
- ✓ Enterprise System API
- ✓ Dynamic Flow
- ✓ Single Sign On (SSO)

Eliminate Paper & Point Solutions

SafetyChain is the only solution that enables your plants to capture production data in real-time using manual, automated, and API data collection. From safety and quality checks completed on the floor with mobile devices to integrated sensors on your equipment, SafetyChain unlocks the data to improve production.

Platform Features

LINK analytics (BI)

Audit management

Native mobile apps

Device connection

Form management

Document repository

Task scheduling

Notifications & alerts

Program manager

Traceability & RCA

Proven Platform. Proven Partnerships.

Integrated Technology

OEE
Production uptime & maintenance

QMS
ISO, GFSI, HACCP, Checks Programs & Plans

SPC
Real-time process control

Compliance
CAPA, Audit, EHS

Supplier
Supply chain risk & Compliance

One Application

Phones. Tablets. Workstations.
iOS, Windows, Android

ENABLING YOUR KEY INITIATIVES

Continuous Improvement
Digital Transformation / Paperless
Traceability / Blockchain / IoT

Integrated Data

Human Collected Data
Mobile data capture on plant floor in online/offline mode

Sensor Data Capture
Banner Sensors for In/Out, Counts, Downtime for OEE KPIs

IoT Data Capture
Interval data from IoT Sensors, PLCs & Equipment

API Data Integration
Capture data from other enterprise systems via API

“Now that we have SafetyChain, our team can’t wait until our next audit!”

“In solving our paper problem we actually ended up solving a much bigger business problem with SafetyChain.”

“SafetyChain trends data and allows us to configure reports without any add-on costs or technical abilities. For us, it was a better fit.”

About SafetyChain

SafetyChain is the #1 Plant Management Platform that improves yield, maximizes productivity, and ensures compliance for process manufacturers. Trusted by over 1,500 facilities, SafetyChain is the only enterprise solution uniting production, quality, safety, and supplier management.
