

1. On the map screen of the Integra, select the wrench:

2. On the Rate Control Screen, select the Load Prescription button. *Split planter would have Product 1 and Product 2.* 

- 3. You will highlight the correct **AgSetup**, **irx** or **shp** file and press the **green check**.
  - a. You may need to continue to open up the folder to find the prescription by using the "+" button.
  - b. You will know you are successful when you see a preview of the Rx in the lower right-hand part of this screen.

Import Prescription: Select File
