**NEXT-GEN MSP**

PLATFORM

Reduce Spend
Gain Operational Efficiency

Onix Next-Gen Managed Service Provider (MSP) Platform is designed to solve your end-to-end cloud operations and management challenge. Eliminate the operational burden and cost of maintaining your cloud infrastructure at scale by offloading the continuous operations of cloud workloads to Onix.

Cloud-Native Services

Onix automation, runbooks, and proprietary frameworks streamline our services to optimize your cloud environment.

Well-Architected Design

We continuously optimize your workloads for cost, operational efficiency, scalability, reliability, and security.

Reduced Operating Budget

Our tools, services, and automation reduce your internal tool and infrastructure costs by 20% - 35%.
