

A Smart Switch

Our large Midwest-based biotech customer had been purchasing traditional 30-day job posting credits, buying ad hoc job packs and manually posting open roles to the BioSpace site.

Their HR team was struggling to keep up hiring tasks for all their new open roles, and their talent pipeline wasn't growing fast enough.

They wanted to simplify the job posting process, increase the number of applicants and save time on administrative tasks.

They switched to our Unlimited Jobs solution and within weeks experienced a huge boost in volume.

**Plus, they got all these great results for less money.
Their cost per posted job decreased by 92%.**
