

## A Smart Switch

Our San Francisco-based biotech customer had been purchasing traditional 30-day job posting credits, buying ad hoc single jobs and job packs and manually posting open roles to the BioSpace site.

As their open roles increased, it was becoming more time-consuming and expensive to post their jobs.

They wanted to simplify the job posting process, increase the number of applicants and get more brand exposure in a way that was cost-effective.

They switched to our Unlimited Jobs solution and within weeks experienced a huge boost in volume.

**Plus, they got all these great results for less money.  
Their cost per posted job decreased by 90%.**
