

A Smart Switch

Our mid-sized biotech customer in Boston had been purchasing traditional 30-day job posting credits, buying ad hoc single jobs and manually posting open roles to the BioSpace site.

Their small HR team was struggling to stay on top of all their administrative tasks with the time it took to manually post jobs and hire.

They wanted to simplify the job posting process, increase the number of applicants and save time on manual tasks.

They switched to our Unlimited Jobs solution and within weeks experienced a huge boost in volume.

**Plus, they got all these great results for less money.
Their cost per posted job decreased by 85%.**
