

VisionTime At Work

New System Features To Support You

For the foreseeable future many staff will
continue to work at Home

Then organisations and employees are also anxious
that their "return to the workplace" phase is done safely ...

and that visitors are catered for too.

VT @HOME

VT@Home is designed to support you and your employees in working from home. Employees can record the following at PCs, Tablets and Mobiles:

- if at home, mobile, or at workplace
- their work tasks
- visits to other worksites, dentist etc

Also:

- all can view who is available— in real-time; Pop-up messages as/he clocks on/off

Presence Panel For Use By HR or Super User

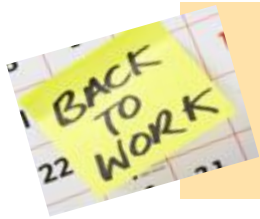

The screenshot displays the 'Presence Panel' interface. On the left, a grid shows employee status by department. The departments listed are Administration, CAD, Manufacturing, Logistics, Marketing, and Machine Shop. Each department has a row of colored boxes representing individual employees. A yellow box indicates 'Clocked In', while other colors represent various absence types. On the right, a 'Legend' section lists the following status types with corresponding colored boxes:

- Clocked In (Green)
- Clocked Out (White)
- Starts later today (Blue)
- Business Absence (Dark Red)
- Due in but absent (Red)
- Not due in (Light Blue)
- Annual Leave (Yellow)
- Training (Pink)
- Maternity Leave (Light Blue)
- Cert Sick Paid (Black)
- Annual Lve 1/2 Day (Light Yellow)
- Certified Sick Unpaid (Orange)

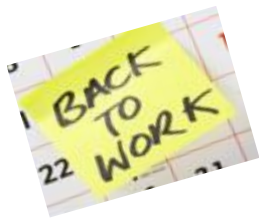

Shows who is at work or not at work by department

New Features To Support You

Meanwhile, if working back at the workplace...

Reason Codes
Absenteeism
Annual Leave

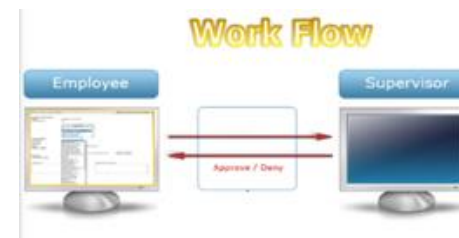

A Rostering programme to
help keep distances between
Staff

Some organisations need employees to request **before** they can visit the workplace

So we have enhanced the request process in the VisionTime calendar console to allow for this and for supervisor approval too

This is effectively managing future
presences

(records all transactions)

Temperature Alert Report

Employees out of temperature range – not allowed to clock in

OR

Clocking is allowed but **eMail alert** sent to person-in-charge if out of the safe range

We have a range of non-touch capabilities:
e.g. fobs, touchless cards, facial recognition, mobile phone via Bluetooth

- Staff, Supervisors, Reception, Security can have rights to set-up visits in advance in software
 - Everyone knows who's visiting/on-site now - with history
 - Temperature camera on arrival - optional

System produces identity badges for visitors

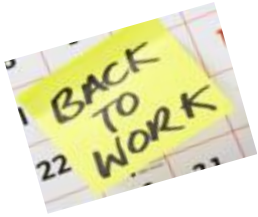

The user can print from our Visitor Manager Software.

- You can search for a visitor who has been on site before
- Badge can change colour - so can't be used next day
 - Prints or reprints a badge

These further features are
under consideration if enough
customers are interested

Under consideration

- **The Risk Assessment Form**

- Employee/Visitor must answer Covid-related questions for entry

- **The Building Capacity programme:**

Capacity of building is set in our system

- Refusal-of-entry due to capacity is linked to:-

No. of "request to enter" forms approved **or**
No. of people already clocked-in

- Refusal-of-entry due to health risk linked to:-

Risk Assessment form

Also under consideration:

Advance capacity reservation

e.g. Capacity is of building is 200 and 100 "spaces" are reserved; only the remainder are available but they decrease on count
