

JobClock® Hornet

Tough Exterior, High-Tech Capabilities

Bye, bye, paper time cards. Our wireless time clock can be locked down anywhere, in any weather, for accurate tracking of hours, travel time and job costing. Data is automatically sent every hour to ExakTime Connect, our cloud-based time and attendance solution, for access from any web-based device.

Provides total flexibility in the field

- Easy clock-in and clock-out with multiple-colored key fobs to represent different job codes and/or locations
- Portable—easy to move, and mount anywhere
- Battery-powered—with no AC power source necessary reliable data storage of up to 20,000 time punches, even if the battery runs out

Works with your accounting program

No more adding up the numbers manually and no more disputes about attendance or hours. Data from the JobClock Hornet is easily transferred to your accounting package for much simpler payroll—no more double-data entry required cloud.

Quick Rewards, Big-Time Benefits

- Accurate time tracking saves thousands—no more time “rounding” remembering schedules or filling out time cards
- Track hours and cost codes easily with colored Keytabs
- Digital records automatically sent every hour for easy review & compliance
- Data is shared with your payroll system in seconds

A Simple, Effective System

Touch

At any worksite, employees carry Keytabs on their keyrings and touch them to the JobClock Hornet to clock in and out.

Connect

JobClock Hornet sends time punches and cost code data to the cloud every hour. This lets you manage your workforce as the week progresses.

Reports

Time punches from JobClock Hornet appear in ExakTime Connect, which creates digital time cards and 12 instant and powerful labor management reports.

Stay Connected

Use Jobclock Hornet at any job site, no matter how remote or tough. Time punches gathered while out of range are automatically sent when cellular service is restored.
