ExakTime Mobile App

Powerful, compliant cloud-based time and attendance app

Track labor in real time, view data from anywhere

Workers simply enter their unique, 4-digit PIN number and tap the green 'Go' button to clock in or the red 'Stop' button to clock out. Using the ExakTime solution along with the ExakTime Mobile App, all data is synced giving you the power to manage your teams from anywhere.

GPS precision

The software pinpoints workers' locations at clock-in and clock-out and uses your custom-set geofences to mark each timestamp as on or off-site. Our GeoTrakker feature lets you track workers as they travel, so you know where they are as long as they're on the clock.

FaceFront photo ID verification

FaceFront uses your device's front-facing lens to snap photos of workers as they clock in and out. Simply match these with employee master photos stored in your office computer (no more buddy-punching).

Scheduling & remote oversight

Schedule worker shifts and tasks in advance, and never wonder what's happening at a remote job site. ExakTime Mobile gives you a one-screen snapshot of any job site with a live feed of clock-in and clock-out activity, a running labor budget, Field Notes, weather and more.

Field notes

This feature allows workers or supervisors in the field to record text, audio or photo updates that are sent to the cloud with one click, for review now or later in ExakTime Connect.

Supply needs or purchases, equipment incidents or repairs can be easily conveyed with multimedia updates that appear instantly on the ExakTime Connect dashboard.

Mobile compliance

Tracking compliance with our mobile app is easy and reliable. Workers can review digital time cards and approve them with a signature. You can also prompt employees to sign off on compliance-related questions regarding breaks and injuries at clock-out. This information protects your business from audits, lawsuits and fines because you'll have digital proof of checking all compliance boxes.

RescueTime app reports that people spend almost 200 minutes on their smartphones every day. A time tracking app adds just a few more—and can save companies thousands of dollars.

ExakTime Mobile Benefits

- Track your employees with accuracy on the device you already own
- Know when employees are at the job site
- See a map view of which crews are clocked in, and at what location
- Post shifts to workers' schedules, track activities and budgets as projects progress
- Review data on the go or at your desk via ExakTime Connect
- Collect employee time card approvals with signature on the go
- Transfer information easily to your accounting program

iOS & Android Compatible

- Works on any iPhone or iPad with iOS 10 to the latest version or Android running iOS 6 to the latest version.
- FaceFront works on devices with front-facing cameras using iOS 10 or later and iOS 6 or later.
- Please ask your sales representative for additional details.
