

FOR INSURANCE CLAIMS PROCESSING

Close The Information Gap With AI Power

Stay one step ahead of critical claims information with **Sage by ProNavigator** - the only SaaS knowledge management platform **purpose-built** for insurance. No more loopholes in claims processing or second-guessing if relevant information is missing. Sage puts information at your fingertips with unmatched AI-power, accuracy, and speed.

With Sage, you can:

Retrieve exactly the information you need in seconds

Leverage a central knowledge base searchable by contextual AI

Get a comprehensive view of essential documentation

Mitigate the risk of operational losses in overpaid claims

Trusted by 125+ insurance organizations across North America

Don't Leave Money On The Table

Most overpaid claims are caused by human error, missing information or a breakdown of processes. Reduce an estimated **5-10% in annual payouts** due to claims leakage by adopting a thorough knowledge management strategy with Sage by ProNavigator.

Search the Way You Speak

ProNavigator's Sage platform applies cutting-edge **machine learning** and **NLP** that is trained on insurance terminology - it understands language used by front-line insurance workers. Plus, Sage's built-in data models have run thousands of searches and get better every time.

Go Deep with AI-Power

Enlist Sage's AI-powered search and discovery to parse **interpretation notes** along with coverage, exclusions and wording information. Go beyond traditional document formats and retrieve highly accurate information in excerpt previews.

 Sage helps to streamline access to product knowledge, limit phone calls, and have information at your fingertips, ultimately allowing more time to focus on: providing advice and excellent customer service.
