

FOR INSURANCE **UNDERWRITING** AND **PRODUCT** MANAGEMENT

Empower Your Team to Become Experts

Boost your team's productivity with **Sage by ProNavigator** - the only SaaS knowledge management platform **purpose-built** for insurance. No more laborious sifting through 150-page underwriting manuals and content stored in several file locations. Sage puts information at your fingertips with unmatched **AI-power**, accuracy, and speed.

With Sage, you can:

Retrieve mission-critical insurance content in seconds

Leverage a central knowledge base searchable by contextual AI

Lower ad-hoc calls to underwriters or managers by 15%

Ensure consistency and accuracy across teams and regions

Trusted by 125+ insurance organizations across North America

- Analytics & Insights

BENEFITS AT A GLANCE

- Time Savings per FTE
- Self-Service of Staff
- More Staff Capacity
- Higher Productivity
- Increased Sales
- Faster Onboarding
- Less Training

Keep Your Teams In The Loop

Frequently changing insurance information makes it hard for everyone to stay on the same page and opens the door to human error. Sage offers one spot to push updates that teams and agents won't miss. And with automated version control, the latest and **most-up-to-date** version will always be surfaced by default.

Benefit From Built-In Analytics

Get insights into **knowledge requests** from staff such as types of questions asked and documents referenced. This will help you uncover trends that can be used for marketing, training, and product decisions.

Unleash AI-Powered Search

ProNavigator's Sage platform applies cutting-edge **machine learning** and **NLP** that is trained on insurance terminology - it understands language used by front-line insurance workers. Plus, Sage's built-in data models have run thousands of searches and get better every time.

 Sage helps to streamline access to product knowledge, limit phone calls, and have information at your fingertips, ultimately allowing more time to focus on: providing advice and excellent customer service.

Supercharge Productivity

Finding information faster helps front-line insurance staff or agents become more **self-sufficient** and productive, eliminating ad-hoc content requests. More importantly, it frees up capacity of underwriters or managers to focus on other things - such as placing more business.
