

Mobile Lead, Senior Frontend Engineer

The Role

Currently working remotely

As the Senior Frontend Engineer you will have direct input on the architecture and strategy for the modernisation of our platform. We need a Senior Frontend Engineer to work with our design, UX, product, production and the content teams to develop user interface concepts, and innovate/advocate the use of the latest technologies and technology trends with a focus on performance, quality, reliability, and security. We need your experience as a Senior Frontend Engineer to work collaboratively with our Sales, Marketing, Product and Engineering teams to create a world-class customer experience, by writing clean, comprehensive and scalable code in React Native. You will be predominantly working remotely with travel to London as and when required.

- React Native.
- Direct input on the architecture and strategy
- Develop user interface concepts
- Focus on performance, quality, reliability, and security
- Ensure long-term solutions are pursued
- Agile Scrum
- Analyze app speed
- Research, test and benchmark
- Create well-organised code
- Design and implement applications
- Work collaboratively to create a world-class customer experience.

The Person

You will have a demonstrable understanding of JavaScript and a broad knowledge of the web platform as a whole (HTTP, web performance, web security, frameworks). Your ability in semantic markup with HTML5 and CSS3, and a good comprehension of at least one of: SCSS, SASS or Styled-Components will be highly desirable from any application. If you have a good understanding of iOS, Android SDK and development tools, and previous experience working with version control (Git, Bitbucket, etc) we know that your work will be able to make a difference. This role requires 6/7 Years developing front-end applications which must also incorporate 2/3+ Years experience using React Native. Your knowledge and experience of the release lifecycle on TestFlight, App Store and Google Play Store will be essential to the position of the Snr Frontend Engineer in our company. If you feel that you have the drive, energy, and enthusiasm outlined coupled with the experience then we would appreciate it if you took the time out to apply.

The Company

At Circus Street we are passionate about creating an inclusive and diverse working culture that puts its people at the heart of its business. A culture that supports employees in both their professional and personal development, creating a fast paced, entrepreneurial and supportive environment where all employees can thrive.

We are a training organisation that builds digital and data capability for the world's leading brands. We use storytelling, award winning visual media and interactivity to create a highly effective and engaging learning experience that is delivered exclusively online. The learning programs we develop equip teams with the tools and knowledge to work more effectively with colleagues, partners and customers and creates real business impact.

Circus Street is delivering dynamic customised global learning programs to more than 200 'Fortune 500' brands around the world, to populations ranging from 1,000-100,000+ users. The business focus is on maintaining its edge in the continuously evolving digital age, driving exponential growth and global expansion.

Circus Street was founded in 2009 in our London head office, and now employs more than 100 people across our global sites in New York, Austin, Singapore and Sydney.
